Development of Total *Installed Wind Power Capacity

(GWEC-GLOBAL WIND 2006, 2007, 2008, 2009, 2010 REPORT より作成)

Wind power is one of the most important natural energy resources in the world, and many countries are interested in using it. According to data on global wind power development, installed wind power capacity is growing rapidly. In 1996, the total installed wind power capacity in the world was only 6,100 MW. By 2010, however, the capacity had increased to 197,039 MW. One of the reasons for this rapid growth could be that quite a few countries are struggling with serious environmental issues, such as improving air quality and reducing the amount of CO₂ to fight against climate change.

The graph above shows the development of total installed wind power capacity in six different countries. In 2006, Germany had the largest wind power capacity, but growth was slow after that. On the other hand, development in the US was so rapid that it became the country with the largest installed wind power capacity in 2008. Another country which achieved rapid development is China. In 2006, it had the fewest windmills, but it became the country with the largest installed wind power capacity in 2010. That year, China had nearly 45,000 MW of wind power capacity, which made up 22.7% of the world total, followed by the US at 20.4%. Spain was the second leading country in 2006, sharing second place with 15.6% of the world total. However, it was only the fourth largest in 2010 with 20,676 MW of wind power capacity.

According to more recent data on installed wind power capacity from January to December in 2011, the leading country, China, reached 26.2% of the world total. India was still fifth, but its capacity was growing more rapidly than that of many other countries. As the technology gradually becomes less expensive, it is likely that more countries will install more windmills.

(注) install ～を配備する MW メガワット

1 In the graph, (A), (B), and (C) refer to: 21

- | | | |
|---------------|-------------|-------------|
| ① (A) China | (B) US | (C) Germany |
| ② (A) US | (B) China | (C) Germany |
| ③ (A) China | (B) Germany | (C) US |
| ④ (A) Germany | (B) US | (C) China |

2 The graph shows that 22

- ① Denmark showed great development between 2006 and 2010.
- ② the wind power capacity in India increased over 20,000 MW in four years.
- ③ Spain had the third largest wind power capacity in 2010.
- ④ none of the six countries surveyed had more than 40,000 MW before 2009.

3 According to the graph and the passage, 23

- ① global installed wind power capacity grew more than thirty times between 1996 and 2010.
- ② the US had less than 10 percent of the world's total wind power capacity in 2010.
- ③ four countries out of the six surveyed had less than 20,000 MW of wind power capacity in 2009.
- ④ five countries out of the six surveyed had more than 10,000 MW of wind power capacity in 2006.

4 According to the passage, 24

- ① fewer countries will be interested in installing windmills in the near future.
- ② China had more than half of the world's total wind power capacity in 2011.
- ③ India overtook China in installed wind power capacity in 2011.
- ④ a decrease in the cost will encourage more countries to install windmills.

7 次の英文を読み、1から4の 内に入れるのに最も適当なものを、それぞれ①～④のうちから一つずつ選びなさい。解答番号は 25 ～ 28 。

Trudi Buchner is a woman who lives with her family in Canada. Two weeks before Christmas in 2010, she lost her gold wedding ring. She took it off before she began baking some cookies for Christmas. She loved baking and always took her ring off when she baked. She thought she had put it on the kitchen counter. Later, she went to the counter to put her ring back on, but it wasn't there. She looked around the kitchen but couldn't find it. She was surprised and a little worried, but she thought that it would turn up later.

Two days passed, but her ring didn't appear, so she started to look for it more carefully. She looked everywhere in the kitchen. She looked in the other rooms in the house. She looked in the pockets of her clothes. She tried very hard to think about how the ring could have gone missing. She thought and thought, and she looked and looked, but she couldn't find it anywhere. Finally, she told her husband, daughter, and son, and they looked for a while, too, but they all gave up. Trudi thought she would never see the ring again.

Then on Christmas morning, her family gathered in the living room to open presents. After most of the presents had been opened, her son handed her a small package. The package had a red tag saying, "To Trudi." Trudi was curious. She wondered who it was from. She unwrapped it quickly and opened the box. Inside, she found her ring! Trudi looked at her family. They were all smiling, and then her husband explained. Her son had baked a small cake the day before. When he poured the flour into a bowl, he heard a strange sound. There in the bowl was his mother's wedding ring! Somehow the ring had fallen into the bag of flour when she made cookies. When he found it, he suddenly got a good idea. Instead of just giving it back to his mother, he decided to wrap it and give it to her as a special Christmas present. That made it an unforgettable Christmas for Trudi.
