

60th anniversary of Japan's accession to the OECD

# 22<sup>nd</sup> OECD / Japan Seminar

Theme

## From the lessons of PISA 2022 to the future of learning - Focusing on mathematics Education

As part of MEXT's support for the education-related work carried out by the OECD, the OECD/Japan Seminar has been held in Japan in co-sponsorship with the OECD since 1993.

The 22<sup>nd</sup> Seminar will be an opportunity to report the outcomes of the analyses of PISA2022, such as the special characteristics and issues of education in Japan and other countries made evident by the international comparisons over time. Furthermore, these outcomes will also provide fertile ground for discussion on the current situation and issues and future direction for Japanese education.

In particular, discussion will be focused on mathematics education since the major domain for PISA 2022 was mathematical literacy as well as on the learning environment, which has changed significantly in the wake of the COVID-19 pandemic and the emergence of AI. It will also aim to promote evidence-based policymaking on education.
