

## **Expo-Sciences Asia 2-8 April in the State of Kuwait**

### **The Paper of the Asian Youth about the investment of Free time in Science and Technology**

**The Expo-Science is one of the means that develops the scientific competence of the youth mainly and especially the students at the different learning stages. The first Expo-sciences Asia that the state of Kuwait hosts from 2-8 April 2010 will give the opportunity to the Asian youth to identify the importance of investing their free time in science and technology through the exchange of experience with Asian Youth and leaders. This concept will be investigated and results will emanate through the papers that each participating delegation will present during the Expo on the topic of investing the free time in science and technology. The participating delegations will be give the opportunity to present their attitudes about this topic in the workshop that will be divided into two sessions where the students present their ideas and points of view through( a film- worksheets- PowerPoint-slides..). We would like to note that the topic of the investment of the free time is applicable in many fields and we would like exactly to know your opinions about investing the free time in science and technology through the following three points:**

- The problems: ( the problems that are the lack of investment of the free time)**
- The causes: ( The causes of these problems)**
- The solutions: ( Your suggestions and propositions to**
