### 【3. Contents of the Course】

#### [Outline]

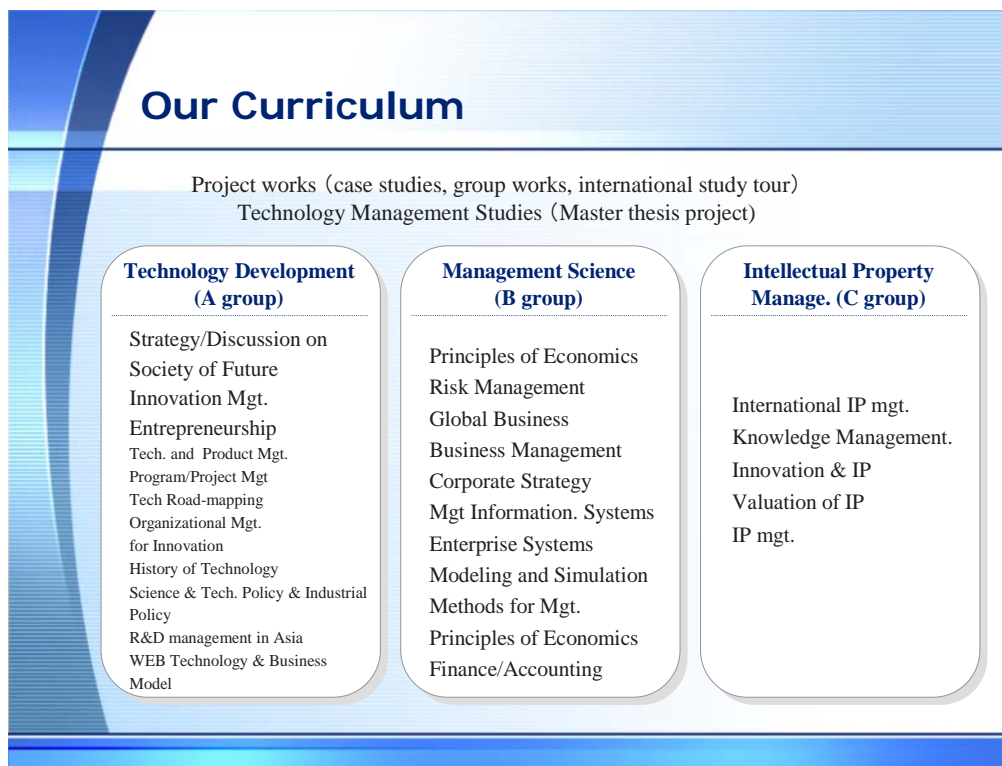

International Technology Management Program is designed for the students those who are interested in studying technology management and Japanese business. Courses are taught either in English or Japanese, so that students, those who do not have enough Japanese language ability, can start with English courses. During two year period of master course, students are expected to achieve working level Japanese language with a help of Japanese language classes. Career supports are also provided.

We provide Japanese-English seamless education system for special classes. Seamless education is consisted of classes in English and classes in Japanese. Classes in Japanese offer teaching materials in both English and Japanese. The goal is that students who are not good at Japanese, can improve Japanese proficiency level by taking classes in English in first year and then classes in Japanese in second year.

#### [Contents]

Our curriculum consists of the classes, offered by the Department of Technology Management (\*) for Innovation, project based training courses and master thesis. There are some supplementary Japanese courses as well.

The classes are consisted of Technology Development (A group), Management Science (B group), Intellectual Property Management (C group). For master degree program, at least three classes from A group, three classes from B group, and one class from C group should be taken. Our curriculum is also designed for students who are not good at Japanese. Some classes (corresponding to the minimum requirements as mentioned above) are taught in English. In Japanese classes, some course materials are provided in both Japanese and English.

※ For details of this our department, please visit the following websites:

<http://tmi.t.u-tokyo.ac.jp/english/> (in English)

<http://tmi.t.u-tokyo.ac.jp/> (in Japanese)

[Application Procedure]

Deadline of application is December 31th for those who start in October of the following year.

TOEFL and GRE (Graduate Record Examination) scores are required for application, so that an applicant must take these examinations in advance.

Detail of application can be downloaded at the following website.

<http://tmi.t.u-tokyo.ac.jp/english/admission/itmp.html>

[Languages]

Both English and Japanese are used. Students who are new comers from the overseas can take classes in English, and in the second years, according to the Japanese proficiency level, classes in Japanese will be taken.

[Internship]

This program offers internship chances in the following Japanese companies to students who wish to do internship.

- Electronics companies:  
Fujitsu, Hitachi, Mitsubishi Electric, NEC
- Automobile companies :  
Nissan Motors
- Trading companies:  
Mitsubishi Corporation, Mitsui & Co.
