

[FY 2007]

Solicitation of the plan for establishing the COE (for foreign referees)

Institution Name		Institution number		Serial number		
1. Applicant (President)	(Name)					
2. Application field Circle the appropriate field.	A <Life sciences> B <Chemistry, material sciences> C <Information, electrical and electronic sciences> D <Humanities> E <Interdisciplinary, combined fields, new disciplines>					
3. Program title						
<Research field>, (keywords)	< _____ >, (_____) (_____) (_____) (_____) (_____)					
4. Department of graduate school Underline the core department						
5. Program members: A total of _____ members						
Name(Age)	Affiliated department, position title	Specialized field, Academic degree	Division of roles (role for the plan in first fiscal year)			
(program leader)						
6. Budget requested (Exchange Rate: USD/JPY=120)						
FY	2007	2008	2009	2010	2011	Total amount
Amount	U.S.\$	U.S.\$	U.S.\$	U.S.\$	U.S.\$	U.S.\$

(Institution name: _____ Program title: _____)

1. Outline of the plan for establishing the COE

2. Objectives, needs/importance and prospective impacts of the COE establishment

- 1) Describe briefly the disciplines which this proposed COE covers.
- 2) Describe the concepts and objectives of your plan and the need for establishing the COE. (How you will build a research base for conducting creative, pioneering research activities of the world's highest standard. What form your COE will take.)
- 3) What are the most important reasons for establishing your COE in our country? How can it be expanded in the future? From a viewpoint of international standards, what are the COE's most outstanding and/or unique attributes?

3. Plan for research activities

- 1) Describe the concrete targets for achievement in research activities.
- 2) Describe the concrete plan for achieving the above targets. The plan should include answers for the questions below.
 - i) How will you create an international COE? (For instance, by building international networks, employing and inviting excellent researchers, international exchange of students and young researchers, cooperating with overseas research institutes, and proactively transmitting information abroad)
 - ii) What kind of a framework has been established for the researchers who will participate in the COE establishment to liaise and collaborate and make substantive contributions?
- 3) Indicate the achievements of the proposed COE's research activities that show its potential to become a world-class COE.
 - a) Record of the major research achievements that represent the feature of the proposed COE.
 - b) Major scientific publications (a maximum of five books or journal publications per representative program members, whose names are underlined.)
 - c) Significant prizes/awards and scientific honors
(Indicate the name and year of the prizes/awards and scientific honors received by the representative program members.)
