

Results of Additional Monitoring Survey of  
Environmental Radioactivity Levels in Fukushima Prefecture

May 14, 2011

Disaster Provision Main Office of Fukushima Pref. (Nuclear Power Team)

1. Monitoring date

Friday, May 13, 2011

2. Monitored facilities

Urban parks in which a part of the air dose rates exceeded the government's provisional standard value (3.8  $\mu\text{Sv/h}$ ) in the previous survey (May 6)

One facility (Annex 1: Sakabuta Park)

3. Monitoring results

As a result of the additional monitoring, the air dose rates were measured as lower than the government's provisional standard value in all of the facilities monitored.

4. Measures to be taken, etc.

As for the one facility in which a part of the air dose rates exceeded the provisional standard value in the previous survey but fell below the standard value in this survey, an additional monitoring survey will be implemented roughly within a week. If the rates remain below the provisional standard value in the next survey, a request will be made to lift the restrictions on use.
