

Feature	Background behind the Emergence of Nobel Prize Winners	
	- Aiming at Continuing to Produce Nobel Prize Winners from Japan	1
1	Winning the 2015 Nobel Prize, and the Key to That Achievement	1
	(1) Outline of the research that was awarded the 2015 Nobel Prize	1
	(2) The key to winning the 2015 Nobel Prize	6
2	Looking Back on Previous Japanese Nobelists	16
	(1) What is the Nobel Prize?	16
	(2) Changes in the lineup of Nobel laureates	17
	(3) The life courses of the Japanese Nobel laureates	21

Part I Challenges in Realizing a Super Smart Society Supported by the IoT, Big Data, and Artificial Intelligence - Japan as a Global Frontrunner

Introduction	44	
Before Reading Further	46	
Chapter 1	The Advent of a Super Smart Society	51
Section 1	Japanese Society in the Future	51
	1 Purchasing Customized Goods and Friendly Services	53
	2 Town Planning and the Local Production of Energy for Local Consumption	55
	3 Desirable Crops Grown to Order	56
	4 Healthcare Management on a Daily Basis	58
	5 The Joys of Everyday Life at a Nursing Home	60
	6 From Planning to Maintenance of Buildings	62
	7 Sharing of Various Systems for Disaster Prevention and Mitigation	64
Section 2	The Super Smart Society of the Future	69
	1 Toward the Realization of a Super Smart Society	69
	(1) Elements common to various aspects of our future society	69
	(2) Sharing of a vision toward a super smart society	70
	2 Major Socioeconomic Changes Associated with the Realization of a Super Smart Society	71
	(1) Changes in industrial structure	71
	(2) Changes in the employment situation	77
	3 Trends of Foreign Countries towards a Super Smart Society	82
	(1) Policy trends of foreign countries	82
	(2) Trends of businesses in the U.S.A. and Europe	86
	4 Japan's Current Efforts and Challenges towards Realizing a Super Smart Society	88
	(1) Policymaking by the government	88
	(2) Efforts by the private sector	90

(3) For sharing a vision of a super smart society: Closer connections between STI and our society 94

Chapter 2 The Direction of Japan's Efforts towards Realizing a Super Smart Society (Society 5.0) 97

Section 1 Promotion and Systemization of R&D that Supports a Super Smart Society 97

1 History and Current State of Core Technology for a Super Smart Society 97

(1) History of the development of computer technology 97

(2) History of the development of network technology 100

(3) History of the development of robot technology 103

(4) A history of the development of artificial intelligence technology 105h

2 The Strengths and Weaknesses of Japan 108

3 Efforts towards Realizing a Super Smart Society 120

(1) Efforts to systematize core technologies 120

(2) Strategic strengthening of infrastructure technology for the super smart society 122

Section 2 Innovation of Techniques for Creating Science, Technology and Innovation in a Super Smart Society 132

1 A Super Smart Society and Open Innovation 132

(1) Reinforcement of the systems that support the realization of a super smart society 132

(2) Enhancement and practical application of basic technologies that support a super smart society 136

2 System Improvement towards Realizing a Super Smart Society 138

(1) System improvements necessary for realizing a super smart society 138

(2) System reforms necessary for realizing a super smart society 145

3 Paradigm Shifts in Scientific Research 150

(1) New research methods made possible by information and communications technology 150

(2) Open science 153

Section 3 The Development and Securing of the Human Resources That Will Contribute to a Super Smart Society 158

1 Human Resources Necessary for Realizing a Super Smart Society 159

(1) Artificial intelligence engineers who are knowledgeable about the latest technologies 159

(2) Data scientists 161

(3) Cybersecurity experts 163

(4) Entrepreneurial human resources 167

2 The Fostering of Qualities and Abilities Necessary for Survival in a Super Smart Society 169

(1) The steady implementation of education reform towards the realization of a super smart society 170

(2) Improvement of the relearning environment for a super smart society 176

(3) The path toward a super smart society 178

Conclusion 180

Part II Measures Implemented to Promote Science and Technology

Chapter 1	Development of Science and Technology	185
Section 1	The Science and Technology Basic Plan	185
Section 2	Council for Science, Technology and Innovation Policy	188
1	Major Endeavors of CSTI in FY2014	189
2	Strategic Prioritization in the Science and Technology-related Budget	189
3	R&D Evaluation of Projects of National Importance	191
4	Major Deliberations at Expert Panels	192
Section 3	Comprehensive Strategy on Science, Technology and Innovation	195
Section 4	Administrative Structure and Budget for Science, Technology and Innovation Policies	197
1	Administrative Structure for Science, Technology and Innovation Policies	197
2	Science and Technology Budgets	201
Chapter 2	Realization of Sustainable Growth and Social Development in the Future	203
Section 1	Recovery from and Reconstruction after the 2011 Great East Japan Earthquake	203
1	Promotion of Measures to Address Critical Issues	203
2	System Reform for Restoration and Recovery from Earthquake Disasters	211
Section 2	Promotion of Green Innovation	212
1	Promotion of Measures for Accomplishing Critical Issues	213
2	Reforming the Systems for the Promotion of Green Innovation	228
Section 3	Promotion of Life Innovation	231
1	Promotion of Measures to Address Critical Issues	231
2	System Reform for Life Innovation Promotion	237
Section 4	System Reform toward the Promotion of Science, Technology and Innovation	240
1	Strategic System Reform toward the Promotion of Science, Technology and Innovation	240
2	Construction of a New System for Science, Technology and Innovation	248
Chapter 3	Responses to Critical Issues Facing Japan	257
Section 1	Advancement of Measures for Solving Key Issues	257
1	Assuring Safety, Affluence and High Quality of Life	257
2	Strengthening of Japan's Industrial Competitiveness	266
3	Contributing Solutions to Global Issues	268
4	Foundations of the State	272
5	Improvement and Enhancement of Common Science and Technology Infrastructure	283
Section 2	System Reforms towards Solution-Oriented R&D	289
1	System Reforms for Promoting Solution-Oriented R&D	289
2	The Establishment of Systems for Promoting R&D That Should be Led by the Government	289
Section 3	Strategic Development of Global Activities in an International Context	290

1	Promotion of R&D toward Solutions to Common Issues in Asia	290
2	New Developments in Science and Technology Diplomacy	291
Chapter 4	Enhancement of Basic Research and Human Resource Development	305
Section 1	Radical Enhancement of Basic Research	305
1	Enhancement of Diverse and Creative Basic Research	305
2	Strengthening World-Leading Basic Research	309
Section 2	Development of Human Resources capable of Active Roles in Science and Technology Research	310
1	Development of Human Resources Capable of Leadership in Diverse Fields	311
2	Development of Creative, Top-Level, Researchers	314
3	Development of Human Resources for Next-Generation Science and Technology	316
Section 3	Establishment of a World-Class Research Environment and Infrastructure	322
1	Improvement of R&D Environments at Universities and Public Research Institutions	322
2	Enhancement of Intellectual Infrastructure	326
3	Enhancement of Research Information Infrastructure	328
Chapter 5	Development and Promotion of Policy in Collaboration with Society	331
Section 1	Increase in Relations between Society and STI	331
1	Promotion of STI Policies from the Public Viewpoint	331
2	Promotion of S&T Communications	332
Section 2	Promotion of Effective STI Policies	334
1	Strengthening of Policy Planning and Promotion Function	334
2	Enhancement of Assessment and Allocation Functions in the Research-Fund Systems	335
3	Enhancement of R&D Implementation Systems	342
4	Establishment of the PDCA Cycle in Science, Technology and Innovation Policy	343
Section 3	Expansion of Research and Development Investment	344

Columns

Feature-1	Measurement and analysis equipment for supporting science and technology	10
Feature-2	Interview with Dr. Omura	12
Feature-3	Interview with Dr. Kajita	14
Feature-4	The Nobel Prize in economic sciences	17
Feature-5	Obtaining the right to name Element 113	41
1-1	What is a super smart society?	50
1-2	1964×2020 (Color TV × Technology for Transmitting Images of the Entire Sporting Venue)	68
1-3	What is deep learning?	107
1-4	A pioneering system using big data of the global environment: the Data Integration and Analysis System (DIAS)	121
1-5	Entering the global market by using technologies from fields in which Japan is internationally competitive and by using deep learning	125
1-6	Understanding the Human Mind: What is Cognitive Science?	130
1-7	IoT Lab Selection Grand Prize winner: Liquid Marketing, Inc. Personal authentication of foreign tourists through fingerprints (for identification and payment)	136
1-8	Autonomous Driving System: New Value Generated Through the Development of 3D Location Information Infrastructure	149
1-9	The Development of Image Analysis Software That Supports the Advancement of Science and Technology	157
1-10	Education Network for Practical Information Technologies (enPiT)	166
1-11	First Graders Experience Programming (Tama Municipal Aiwa Elementary School, Tokyo)	172
1-12	What You Never Knew about Cybersecurity (Information-technology Promotion Agency)	173
1-13	Example of Adaptive Learning: Ritsumeikan Moriyama Junior & Senior High School	176
2-1	Use of fire simulations in fire cause investigations	265
2-2	Launch of the Kounotori HTV-5, and the important roles of Astronaut Yui	280
2-3	National Institutes for Quantum and Radiological Science and Technology (QST), a new national research and development agency	286
2-4	The Fourth Annual Global Meeting of GRC held in Tokyo	304
2-5	Development of electrode materials for lithium-air batteries that have a long cycle life and a large capacity	307
2-6	Development of fundamental technology that enables the mass production of influenza vaccines	307

2-7	A spirit of autonomy and independence that has been handed down to younger generations -- Mr. Kajita and Saitama Prefectural Kawagoe Senior High School	321
2-8	The Universe as seen through gravitational waves: Elucidating black holes and beyond	325

The maps in this white paper do not include all the territory of Japan.
