# Evaluation of FY2018 Operating Results for Institute of Physical and Chemical Research (RIKEN)

August 2019 Minister of Education, Culture, Sports, Science and Technology

### Form 2-1-1 National Research and Development Agency / FY Evaluation / Overview of the Evaluation

| 1. Items related to the evaluation |                                      |                   |  |  |  |  |  |  |
|------------------------------------|--------------------------------------|-------------------|--|--|--|--|--|--|
| Agency                             | Institute of Physical and Chemical R | Research (RIKEN)  |  |  |  |  |  |  |
| FY for evaluation                  | FY evaluation                        | FY2018 (4th term) |  |  |  |  |  |  |
|                                    | Mid to long-term objective period    | FY2018-FY2024     |  |  |  |  |  |  |

| 2. Items related to the assessor |  |                            |                                   |
|----------------------------------|--|----------------------------|-----------------------------------|
| The Competent Minister           | Minister of Education, Culture, Sports, Science and Technology |                            |                                   |

| Evaluation and Inspection dept.  | Science and Technology Policy Bureau                           | Dept. and person in charge | Planning and Evaluation Division, |

### 3. Items regarding implementation of the evaluation

July 3, 2019: The 17th Institute of Physical and Chemical Research Sub-Committee ("RIKEN Sub-Committee") of the National R&D Agency Council was held (hearing 1 from RIKEN). July 5, 2019: The 18th RIKEN Sub-Committee of the National R&D Agency Council was held (hearing 2 from RIKEN).

July 31, 2019: The 19th RIKEN Sub-Committee of the National R&D Agency Council was held (opinion gathering)

August 6, 2019: The 15th National R&D Agency Council was held (opinion gathering).

4. Important items and others relating to the evaluation

March 1, 2018: The 4th Term Mid to Long-term Objectives

March 1, 2019: Revision to the 4th Term mid to long-term objectives

March 29, 2019: Revision to the 4th Term mid to long-term plan

# ion, Yasunori Yamashita n, Masao Yokoi

| 1. Overall rating  |  |        |        |        |        |        |        |        |  |  |  |  |  |
|--------------------|--|--------|--------|--------|--------|--------|--------|--------|--|--|--|--|--|
| Rating             | A  | FY2018 | FY2019 | FY2020 | FY2021 | FY2022 | FY2023 | FY2024 |  |  |  |  |  |
| (S, A, B, C, D)    |  |        |        |        |        |        |        |        |  |  |  |  |  |
|                    |  | А      |        |        |        |        |        |        |  |  |  |  |  |
| Reasons for rating | As shown in the overall evaluation of the agency as a whole, the creation of considerable achievements and anticipated creation of achievements in the future and so on were recognized as a result of comprehensive consideration based on circumstances surrounding the agency's business achievements, efforts and so on through its activities and with the national research and development agency's mid to long-term objectives taken into account. |        |        |        |        |        |        |        |  |  |  |  |  |

#### 2. Evaluation of the whole agency

• We recognize significant achievements in various areas concerning, for example, the reorganization of the organization's structure towards building, operating, and upgrading the and towards strategic research and development based on, for example, the national strategy, throughout the first year of Term 4 Mid to Long-Term Objectives period.

• With regard to the new organization structure, we can give good marks to the reform of the research center's operation system, in working towards innovation creation and max achievements, under the President's leadership. In addition, we can give good marks to the creation of achievements in research and development, which in particular are expec including the industry, or which lead the world in each area of research, and to building a track record.

• The following are provided as examples of our achievements in research and development, which were created in fiscal 2018.

[Management, Human Resource Education and Training, Coordination with Outside Organizations, etc]

• We can give good marks to the work towards the contribution to society, the cooperation, the human resource education and training, and the research management to meet the of a new swift and appropriate system, and furthermore to the creation of research achievements at the world's highest level, and to the creation of an organization with a view RIKEN's research, into society in cooperation with research organizations in Japan and abroad of RIKEN.

[Achievements in our progress including strategic research and development based on national strategy among others]

- · Brain science research: We can give very high marks to the achievements in research which discovered that dopamine is involved in the removal of memory concerning traum improvements moving forwards in behavioral therapy for PTSD. Furthermore, we can give very high marks to also, for example, becoming the first in the world to decipher such in the brain's nerve cells, and deciphering the mechanism by which memory of episodes are stored.
- Environmental resources science research: We can give very high marks to, for example, the success of developing a new functional polymer with shape-memory function and also water, acid, and alkali solution.
- Emergent matters science research: We have leading achievement in the world in the area of quantum bit development and quantum non-demolition measurement, in working technology. Furthermore, in the area of quantum simulator, we can give very high marks to the measurement of signals from topological transition in superconducting circuits, build the foundation for a quantum simulator.
- Photon engineering research: We can give very high marks to the achievements in research that enlarged the wavelength range of a high-power mid-infrared femto-second light and attaining peak power of a terra-watt grade in the 1~2 µm wavelength range, significantly surpassing the fiscal year plan at the outside in both wavelength range and output, brings revolutionary progress to the development of high-intensity mid-infrared femto-second lasers.

[Achievements in the building, operations, and upgrades in research platform]

- · Computational science research: We can give very high marks to the contribution to "Kyo" which was operated and maintained appropriately, including stable operations wit operation which surpasses the target of 8,000 hours, and producing more than adequate computational resources to researchers and others; and to the contribution to the advant through, for example, the realization of a system design for "Fugaku".
- Radiation beam science research: We can give high marks to setting the radiation beam usage time to approximately 85% of the total annual runs for SPring-8, and to providing resources to users through, among others, an increase in the usage time through concurrent operation of multiple beam lines in SACLA, and to the usage of approximately 20% of SPring-8 in the industry, and to the contributions through cooperation on readying "a next-generation radiation beam facility" by the National Institute for Quantum and Radiological Science and Technology.

|   |
| th a 98.5% availability rate and 8,348 hours of neement in computational science technologies             |

• Bioresource research: We can give very high marks to the research consistently providing high quality resource and attaining 14,987 in the number of times that resources were supplied, which is 136% over our target; and to maintaining 0% in the recalls rate for 3 years running since fiscal 2016.

• Regarding items related to management, such as streamlining business operations, it can be evaluated that steady efforts are underway generally as planned.

| 3. Issues to be solved and /or improved for each subject |  |

| Auditor's special comments | oIt is recognized that the agency's operation has been properly carried out according to relevant laws and regulations, and effectively and efficiently p   |
|                            | objectives  |

\* Evaluation categories are as follows:

- S: Based on the National Research and Development Agency's aims, businesses with mid to long-term objectives due to comprehensive consideration based on some circumstances regarding the agency's business achievements, and efforts through its activities, especially the creation of considerable achievements, anticipated creation of special achievements in the future and so on toward "maximization of R&D achievements" under the conditions of appropriate, effective and efficient operations are recognized.
- A: Based on the National Research and Development Agency's aims, businesses with mid to long-term objectives due to comprehensive consideration based on some circumstances regarding the agency's business achievements, and efforts through its activities, especially the creation of considerable achievements, anticipated creation of special achievements in the future and so on toward "maximization of R&D achievements" under the conditions of appropriate, effective and efficient operations are recognized.
- B: Based on the National Research and Development Agency's aims, business with mid to long-term objectives due to comprehensive consideration based on some circumstances regarding the agency's business achievement, and efforts through its activities, a certain degree of expectation for the creation of achievement and creation of achievement in the future toward "maximization of R&D achievements" were recognized, and steady business operations have been also recognized.
- C: Based on the National Research and Development Agency's aims, businesses with mid to long-term objectives due to comprehensive consideration based on some circumstances regarding the agency's business achievements, and efforts through its activities, the creation of achievements, further drastic efforts and improvements toward "maximization of R&D achievements" or "appropriate, effective and efficient operations" are anticipated.
- D: Based on the National Research and Development Agency's aims, businesses, mid to long-term objectives and so on, as a result of comprehensive consideration based on some circumstances regarding the agency's business achievements, efforts and so on, through its activities, special efforts and improvements including a fundamental drastic review, toward "maximization of R&D achievements" or "the appropriate, effective and efficient operations" are required.

ards "a maximization of achievements in of outstanding researchers and readying a er.

view to implementing achievements into formed on schedule.

promoted for attaining mid to long-term

\*1 For items that are set to "high" level of importance, a "circle" shall be marked next to each comment.

\*2 For items that are set to "high" level of difficulty, each comment shall be underlined.

\*3 For items that were selected for reinforcement shall be marked with "Target" next to each criterion.

\*4 In the "Itemized Evaluation Document No" column, the itemized document no in the itemized evaluation document for fiscal 2018 shall be entered.

\*5 Evaluation categories are as follows:

[Administrative and projects related to research and development (I)]

- S: Based on the National Research and Development Agency's aims, businesses, mid to long-term objectives and so on, and as a result of comprehensive consideration based on some circumstances regarding the agency's business achievements, efforts and so on through its activities, especially the creation of considerable achievements, anticipated creation of special achievements in the future and so on toward "maximization of R&D achievements" under the conditions of appropriate, effective, and efficient operations are recognized.
- A: Based on the National Research and Development Agency's aims, businesses, mid to long-term objectives and so on, and as a result of comprehensive consideration based on some circumstances regarding the agency's business achievements, efforts and so on through its activities, the creation of considerable achievements, anticipated creation of achievements in the future and so on toward "maximization of R&D achievements" under the conditions of appropriate, effective, and efficient operations are recognized.
- B: Based on the National Research and Development Agency's aims, businesses, mid to long-term objectives and so on, and as a result of comprehensive consideration based on some circumstances regarding the agency's business achievement, efforts and so on through its activities, a certain degree of expectation for the creation of achievement and creation of achievement in the future toward "maximizing the achievements of R&D achievements" were recognized, and steady business operations have been also recognized.
- C: Based on the National Research and Development Agency's aims, businesses, mid to long-term objectives and so on, and as a result of comprehensive consideration based on some circumstances regarding the agency's business achievements, efforts and so on through its activities, the creation of achievements, further drastic efforts and improvements toward "maximization of R&D achievements" or the "appropriate, effective, and efficient operations" are anticipated.

|  |  | -7 |  |

D: Based on the National Research and Development Agency's aims, businesses, mid to long-term objectives and so on, and as a result of comprehensive consideration based on some circumstances regarding the agency's business achievements, efforts through its activities, special efforts and improvements including a fundamental drastic review, toward "maximization of R&D achievements" or the "appropriate, effective, and efficient operations" are required.

[Other than administrative work and projects regarding research and development (After II)]

- S: Based on the activities of a corporation, remarkable performance exceeding the intended objectives is recognized quantitatively and qualitatively in the mid- to long- objective plan (in terms of quantitative indicators, 120% or more vis-à-vis planned mid to long-term objective value (or planned FY value), and remarkable performance is also recognized qualitatively)
- A: Based on the activities of a corporation, remarkable performance exceeding the intended objectives is recognized in the mid to long- term objective plan (in terms of quantitative indicators, 120% or more vis-à-vis planned mid to long-term objective value (or planned FY value).
- B: Performance exceeding the intended objectives is recognized in the mid to long- term objective plan (in terms of quantitative indicators, 100% or more but less than 120% vis-à-vis planned mid to long- term objective value (or planned FY value).
- C: Performance falls below the intended objectives in the mid to long- term objective plan, requiring improved performance (in terms of quantitative indicators, 80% or more but less than 100% vis-à-vis planned mid to long- term objective value (or planned FY value).
- D: Performance falls below the intended objectives in the mid to long-term objectives, requiring drastic improvement of business including its abolishment (in terms of quantitative indicators, less than 80% vis-à-vis the planned mid to long-term values (or values on prior fiscal year), or it is recognized that the competent Minister is required to make an order for improving business operation or taking other necessary measures).

The following grades are to be assigned when one is forced to raise an evaluation based on qualitative indicators such as evaluation of internal controls, and when operations performance is difficult to measure such as when meeting certain conditions is set as the target.

S:-

A:The agency reached the target level, for targets whose difficulty grade were set high.

B: The agency reached the target level(This excludes items that correspond to "A".).

C: The agency couldn't reach the target level(This excludes items that corresponding to "D".).

D: A fundamental review of operations is needed because the agency couldn't reach the target level, and this includes when the Minister in charge finds that the Minister needs to order improvements in operations management and order other necessary actions.
