(Takuya is a junior high school student. Mr. Ford is an ALT from America and works at Takuya's school.)

Takuya : I was playing soccer with my friends yesterday, but it suddenly started raining.

Mr. Ford : That's too bad. But you can enjoy soccer inside your house.

Takuya : Inside my house? Is that true?

Mr. Ford : Yes. We can enjoy playing soccer on the Internet. It's exciting!

Takuya : I like both playing and watching soccer, but I'm not good at playing computer games. It is different from playing sports.

Mr. Ford : Do you think so? In my country, there are three kinds of sports, physical sports, mind sports and electronic sports. They're all sports. Playing computer games on the Internet is a kind of electronic sports. It is called e-Sports.

Takuya : I didn't know that. Some Japanese people think that playing computer games is different from playing physical sports.

Mr. Ford : I'm surprised to hear that. E-Sports is popular around the world these days.

Takuya : Really?

Mr. Ford : Yes. Do you know "The Asian Games E-Sports Demonstration Event" ? It is an international e-Sports event. It was held in Indonesia in 2018. And in 2022, we will be able to take part in the event in China. We may be able to enjoy e-Sports at the Olympics and Paralympics someday.

Takuya : It sounds interesting. E-Sports may be becoming popular in Japan, but I don't think playing computer games for a long time is good for our health. My mother doesn't either. She often tells me not to play computer games for more than two or three hours.

Mr. Ford : I agree with you and your mother, but I can make many friends around the world through e-Sports. I think it's a new way to connect to the world. Playing e-Sports also has become a new kind of job these days.

Takuya : What do you mean?

Mr. Ford : Today, some Japanese e-Sports players are working for professional soccer teams. They have played computer soccer games for a long time, so they

are familiar with playing soccer. E-Sports players watch the soccer players on the ground and give them some advice at the team meetings.

Takuya : Really? That's important for professional soccer players. I think it's necessary for other professional sports teams too. E-Sports isn't just for children and for having fun.

Mr. Ford : That's right. Some companies in the world hold e-Sports events and support e-Sports players. So I think e-Sports will create many jobs. In the future, we will see many jobs that we can't imagine now.
