Introduction

Survey Overview

Since FY1994, the Ministry of Education, Culture, Sports, Science and Technology (MEXT) has conducted a survey (every two years) to grasp how much it costs for children to receive classroom educations and engage in various activities outside of school.

The purpose of this survey is to obtain basic data for consideration and planning of government policies on educational expenditures. Statistics compiled in the survey will be used to examine various administrative measures as objective data on the situation.

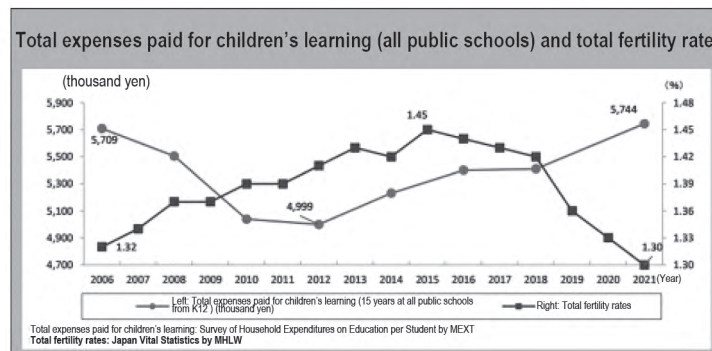

<Examples of use>

- Materials on educational expenses paid by households (Reference 1, Education/Human Resources Development Working Group (3rd meeting), Council for Science, Technology and Innovation, Cabinet Office, (October 27, 2021))
- Document suggesting the importance of raising the disposable income of working-aged people with children to increase the fertility rate to match the rising cost of education (Reference 4, Second Meeting of the Council on Economic and Fiscal Policy, 2024)

* Figure on the left is excerpted from Reference 4

- Data on "Ease of Raising Children" in the "Index for Children and Young People**" (Cabinet Office, Government of Japan, *The administrative works were transferred to the Children and Families Agency)

* In Measures for the Promotion of Development and Support for Children and Young People (decided in April, 2021), various indicators related to the upbringing of children and youth, were compiled, illustrated, and subsequently named the "Index for Children and Young People." This index will contribute to the evaluation of measures supporting the development of children and young people and their development on a society-wide basis.

* In accordance with the Child-related Measures (Cabinet Decision on December 22, 2023), Measures for Promotion of Development and Support for Children and Young People and the above-mentioned index were abolished.

- Reference materials for calculating the amount of high school scholarship supplemental fund (MEXT)
- Study materials on the amount of school expense payments and childcare expenses supports workers' compensation (MHLW)

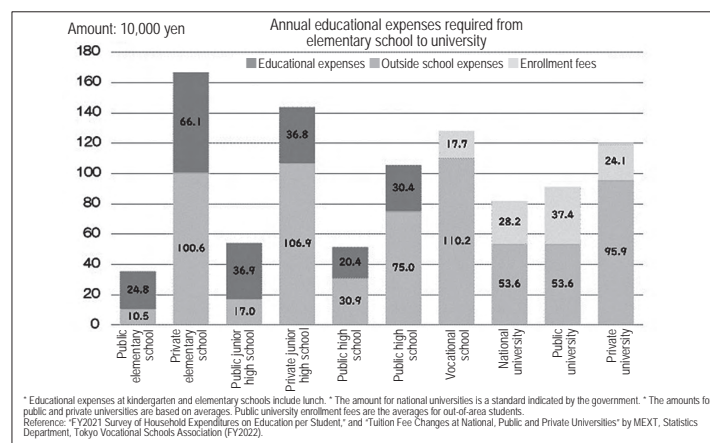

Statistics are not used only by national institutions, but also by the public and private sectors as data to understand the financial burden on households related to education.

<Examples of use>

- **Career guide booklet “Maru-katsu! – Supporting your action plan”** (published by MHLW)

- **Life Planning at a Glance “How much money does it cost for elementary school students?”** (Japan Institute of Life Insurance (JILI))
- **Basic Money Knowledge You Need to Know - Let's Untie the Money Knot! - (FY2023 Version)”** (Issued March, 2023: Child and Family Division, Children’s Future Bureau, Health and Welfare Department, Shizuoka Prefecture)

- **The data showing the status of school education non-tuition expenses for the first year of high school and the expenses paid by household annual income** (The First Experts' Meeting on High School Education with the Declining Birthrate (distributed in advance), December 16, 2019, Kobe City, Hyogo Prefecture)
- **Data for the calculation of the amount of subsidy* for a high school preparatory support project** (Gifu Prefecture, FY2023)
 - * The subsidy is intended to alleviate the financial burden of entering high school, etc. by providing a 30,000 yen per junior high school student as a preparatory grant for entering high school, etc.
- **Data on additional scholarship benefits for high school students from needy households** (FY2022 and FY2023 supplemental projects, Aichi Prefecture)

We have asked prefectures and schools to randomly select approximately 1,600 schools and 53,000 parents nationwide for this survey. To produce accurate and reliable statistics, we would like to ask for your understanding and cooperation in this survey.

※ The responses received will be compiled as statistical data by the Ministry of Education, Culture, Sports, Science and Technology. The data will never be used to identify a specific child, family, or school.

What Is the Purpose of This Survey?

It examines expenditures for one year.

The survey asks about expenses for the one-year period from April 2025 to March 2026. For example, if a survey target child is a first-year student, the expenses paid while they are a first-year student are targets for the survey. (However, the expenses for children who entered kindergarten in the spring of 2025 will also be included in the expenses paid before March to prepare for admission. Please refer to page 14 for details.).

1Since this survey covers a one-year period, parents are asked to write down the education and learning expenses they paid for each child in the relevant areas of "How to Complete the Survey Form Backside / How to Divide Expenses" from page 13 in order to remember.

It examines the expenses paid for one survey target child.

"Survey target child" refers to children in the school year or class who have been asked to participate in this survey. Even if you have several children in your household, please indicate only the cost for one survey target child.

In addition, for expenses such as the purchase of items shared by siblings (dictionaries used together by siblings for home learning, pianos used together by siblings for home practice, etc.), please divide the cost by the number of children who use it together, and answer only the cost for one child.

This survey examines expenditures on education.

This survey covers the cost of your child's school education and various activities at home and outside of school (such as preparation, review, and supplementary learning, lessons, sports, cultural activities, etc.).

Therefore, expenses that are not for daily life or educational and learning are not subject to this survey. For example, please do not include any of the following:

Expenses not covered in this survey (examples)

- ☐ Expenses for the purchase of everyday clothing and household food expenses
- ☐ Cost of lunch brought from home (cost of ingredients for homemade lunches), and money spent in school cafeterias
- ☐ Cost of purchasing items that are mainly used in everyday life (computers, televisions, etc. shared by whole family)
- ☐ Purchase and usage fees for mobile phones, smartphones, etc. (those not used primarily for learning activities)
- ☐ Allowance given to your child (with no specific purpose for purchase)
- ☐ Savings for your child's future, education endowment insurance, etc.

It examines the expenses spent from the household budget.

This survey targets household expenses spent by people who live in the same household as the survey target child (mainly parents).

Please do not include items that your child has selected and purchased from their monthly allowance. However, include money given to your child for the purpose of purchasing specific school supplies, such as to specifically buying a notebook.

Also, please do not include items provided by people from different households, such as school satchels or bags purchased by grandparents or relatives living in different households.

It also examines the situation of households.

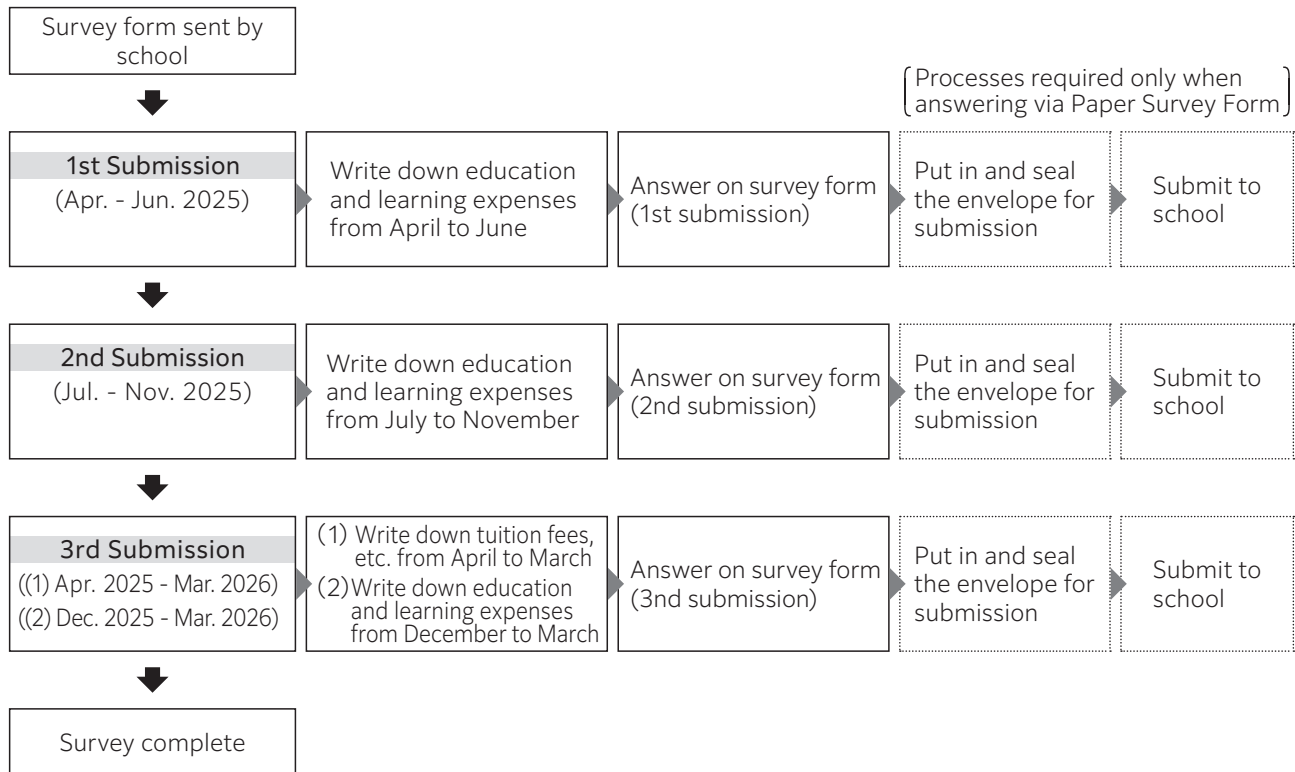

In order to analyze the expenses in detail, the survey form (1st submission) examines the last school the main provider graduated from, the desired school level for the survey target child, and whether the child has siblings, while the 3rd submission examines the annual income of the household.

Please refer to pages 11 through 25 for details.

Survey Process

Please submit the survey form in 3 submissions

For this survey, you will be asked to fill out and submit 3 separate survey forms. Please divide your annual expenses into the following three target periods, and fill out the survey form with expense amounts for each period. Please submit the 1st, 2nd, and 3rd submissions by the submission deadlines.

		Target period
Light blue	Survey form (1st submission)	Apr. - Jun. 2025
Pink	Survey form (2nd submission)	Jul. - Nov. 2025
Yellow	Survey form (3rd submission)	Dec. 2025 - Mar. 2026 ※ For some survey items, we will ask about your income for January to December 2025 and expenditures for April 2025 to March 2026.

Please submit all 3 submissions of the survey form. The Ministry of Education, Culture, Sports, Science and Technology will aggregate all answers for the 3 submissions and convert them into data as for expenses over one year cost. Therefore, all submissions must be sent in order for your survey to be included (it is not possible to aggregate the expenses if any of the 3 submissions are not submitted).

How to Answer Survey

Answering via online survey form

To respond to this survey, at a minimum, please use the “online survey form.”

To complete the “online survey form,” use the “Government Statistics Joint Use System” online survey system. Open a web browser on your computer, tablet, or smartphone and enter the following URL in the address bar, or scan the QR code on the right to access the online survey system.

URL
https://www.e-survey.go.jp/

When you log in to the online survey system, you will need to have the “survey target ID” and “initial password” written in the “survey target information (yellow-green paper)”.

➔ Please refer to page 29 onwards for how to use the online survey system.

- ※ There will be data communication charges when using the online survey system.
- ※ In addition to Japanese, you can switch to English to answer the questions.

For those having difficulty in completing the survey online (Answering via Paper Survey Form)

If you are unable to respond online for some reason, (e.g., your device is not suitable for online response), please use a paper survey form and a survey envelope.

The paper survey form and an envelope will be distributed by your school. If you have not received them, please contact your school. If you need a paper survey form in English, please contact your school for the English version.

If you choose to answer using a paper survey form, write your answers by hand on survey forms provided by the school.

Before completing the survey form, please make sure that the basic information at the top matches the information printed on the “survey target information (yellow-green paper).” If the basic information is blank, please complete the section. If the information does not match the “survey target information (yellow-green paper),” please notify your school as soon as possible.

Survey target information

Top portion of the survey forms (1st to 3rd surveys)

※ When entering the basic information, please refer to the survey target information (yellow-green paper) to avoid making mistakes.

When you have completed the survey form, please confirm that the “school name,” “school year,” and “reference number” are on the front of the envelope, and that they match the “survey target information (yellow-green paper).” If it is blank, please fill in the missing text. If the information does not match the “survey target information (yellow-green paper),” please notify your school as soon as possible.

※ As for your first child who is living independently, as a company employee, you do not need to add him/her here, with the younger children, but at a higher level. The second child, a female/high school student, should be listed in the first child's row, while the third child, a male/junior high school student, in the second child's row. Since the survey target child is the female/high school student, enter a "○" in the line for the first child.

How to Complete the Survey Form Backside / How to Divide Expenses

Please provide the expenses for the period from April to June 2025 on the backside.
Please include any expenses from before March that are related to learning activities starting in April. For example, the following expenses apply:

- Expenses to purchase new notebooks in preparation for new school year starting in April
- Expenses to purchase new uniforms, gym clothes, etc. for new school year starting in April
- Admission fees for new learning activities and cram schools starting in April

Important!

For parents of children who entered school in spring 2025

Expenses paid before March to prepare for admission to school are also targets of this survey, so please include them on the survey form (1st submission). For example, the following expenses apply:

- * Expenses to purchase bags, school satchels, uniforms, school supplies, etc. used after entering school
- * Expenses to purchase school supplies required after entering school

In addition, on the survey form (3rd submission), you will be asked to answer about enrollment fees, facilities maintenance costs paid at enrollment, and exam fees. Please carefully keep notes about the amounts to avoid forgetting about those expenses (please refer to page 22 for details).

There are two main types of expenses to answer about on the backside. Please divide the expenses for each item as shown in the following example.

Even if there were no expenditures at all during the period for all items, please enter "0" in the total column and submit it (if you do not submit the survey form because there were no expenditures, it will be treated as an unsubmitted survey form).

If you make a mistake...

Draw a correction line and write the corrected amount in the margin around it.

You do not need to use correction fluid or tape. In addition, please do not stamp a correction seal (which shows the name of the respondent) or write your signature.

If the survey form is lost or damaged...

Talk to the school and receive a new survey form.

※ Here is a guide on how to divide expenses into the various categories on the backside of the survey form. Please check the expenditure category that applies to each item. If you have any expenditures for education and learning expenses at home, please write them down in the memo section of each item so that you do not forget them.

Parents of All Children

Details

(B)-1 Tuition fee, childcare fee	<ul style="list-style-type: none"> Parents of children entering public elementary and junior high schools do not need to respond (as there are no tuition fees). If you have received a reduction or exemption due to support for high school enrollment, free early childhood education, or the school's own reduction and exemption system, please deduct the reduction or exemption from tuition and childcare fees and calculate the actual amount paid by your family. Even in the case of a reduction and exemption system where the school collects the full amount and returns a certain amount at a later date, please record the amount after the refund. Do not put the usage fee for childcare and after-school childcare (after-school children's clubs) here. These usage fees, especially those with a strong educational element, should be recorded under "B-2-e "Expenses related to cultural attainments, other," and those specialized in childcare elements do not need to be included in your responses to this survey.
(B)-2 Facilities maintenance cost	<ul style="list-style-type: none"> Please only respond if you are a parent of a child attending a private school. "Facilities maintenance costs" can have various names depending on the school your child attends (facility costs, maintenance costs, operating costs, etc.). Please provide the amount of fees paid to the school in a lump sum for this fiscal year, excluding tuition and childcare fees, regardless of the name. For parents of children who entered nursery or school this spring, please record the entrance fee, nursery fee, and facilities maintenance cost paid at the time of enrollment under "(Only for those whose children enrolled in schools, kindergartens this fiscal year) (A)-1" and "(A)-2," respectively.
(B)-3 School trip expense	<ul style="list-style-type: none"> Please provide information on school trip expenses only if those school trips were conducted for your child's grade in fiscal 2025. If you have only saved money for school trip expenses for the next fiscal year or later, please do not include those reserve funds in your response. ※ For example, for elementary schools conducting school trips for 5th graders in 2025, please provide the school trip expenses if the survey target child is in the 5th grade. For a child in grades 1 to 4 or grade 6, there is no need to respond for school trip expenses. Answer with the total amount paid to the school. Please provide the total amount paid to travel agencies, etc., even if the payment was made directly to them instead of the school. Please also include any reserve funds for school trips that were saved up for this fiscal year's school trips. Please record personal expenses such as bags for school trips under "A-6 Extracurricular activities costs" on the backside.
(B)-4 Outside school expenses	<ul style="list-style-type: none"> Please respond with expenses paid for school excursions, tours, outdoor activities, group overnight trips, outside classes, etc. (admissions fees, transportation expenses, etc.). (B)-5 Class, student council expenses	<ul style="list-style-type: none"> Please respond with the amount paid for class activities, grade activities, and school-wide student council activities, regardless of the name such as "class fees."
(B)-6 Lunch costs	<ul style="list-style-type: none"> Please respond with the amount if school lunches are provided at least once a week. If you are paying the school regularly for meals provided during regular school hours, even if it is only for snacks, or if you are purchasing delivered lunch boxes at school, please include it in your response. Events that offer meals, etc. exclusively for a limited time during the event are not targets. Please do not include the cost of meals purchased by your child at a store, etc., or the cost of ingredients for a lunch box brought from home in your response. If you are receiving a reduction or exemption in school lunch fees, please respond with the actual amount you paid after the reduction or exemption. Please provide the actual amount you will have to pay after receiving the refund for reduction systems where you initially pay the full amount and then receive a refund at a later date.
(B)-7 Other school payments	<ul style="list-style-type: none"> Please respond with provide the total amount of expenses paid to the school that do not fall under categories 1 to 6 (for example, health/hygiene expenses, insurance premiums for the Japan Sports Council, heating and cooling expenses, school plays, etc.).
(B)-8 PTA membership fee	<ul style="list-style-type: none"> Please respond with the amount paid for PTA membership fees.
(B)-9 Booster club membership fee	<ul style="list-style-type: none"> Please respond with the membership fees, etc. made to external organizations supporting the school, such as booster clubs and alumni associations.
(B)-10 Donations	<ul style="list-style-type: none"> Please respond with the amount of donations that parents voluntarily contributed to the school. Please do not include personal donations, or donations from anyone other than parents.

Annual Income for Your Household

Please give your "annual income for your household" on the backside.

In this section, please give the total income for the entire family living with the survey target child for one year (January to December 2025 (including tax)). When there are two or more people with income, such as dual-income households, please provide the total combined income of all individuals.

“Annual income” refers to cash income before taxes and social insurance premiums are deducted (known as “gross income”). Please do not include “extraordinary income” such as retirement benefits, savings withdrawals, property sales, etc.

For those who are employed

- Please provide the total amount including salary, wages, and bonuses received from your workplace as the gross income. This includes income from part-time jobs, etc.
- The amount written under “payment amount” on the withholding tax slip for salary income is applicable (not the amount after deductions).

[摘要]

For those who are self-employed or sole proprietors

- Please provide the income amount by subtracting necessary expenses such as purchase amount, raw material costs, personnel expenses, etc. from the sales revenue generated by the business.
- When you look at income tax return form B, the amount related to the business portion is included in the “income amount.

Others

- If you are earning income regularly by renting out properties or land, or receiving income from interest on savings, stocks, dividends, etc., please include that income amount (it falls under “real estate,” “interest,” and “dividends” in the income section of income tax return form B).
- Please include the amount of income received from various social security benefits such as public pensions, employment insurance, child allowances, as well as various assistance provided by the Public Assistance Act and regular allowances.

(1)The items below are related to the situation of your child and your family. These items are questions for only the 1st submission; they are not asked for the 2nd and the 3rd submissions.

That is how to submit a survey form using the online survey system.

Frequently Asked Questions

This is a summary of answers to frequently asked questions. Please refer to this if you are unsure about how to answer. If you find it difficult to make a decision, please contact the call center set up by the Ministry of Education, Culture, Sports, Science and Technology (the phone number for the call center is listed on the last page of these guidelines).

Q1 I mistakenly entered responses for the 1st submission onto the survey form for the 3rd submission. Do I need to rewrite it?

A If you notice your error submitting, please rewrite it on the correct survey form. If necessary, please receive another survey form from the school.

If you notice after submission, please contact our call center.

Q2 I accidentally damaged the survey form. What should I do?

A Please correct the incorrectly filled part by drawing a double line through it (refer to page 14). If the survey form is significantly damaged and you are unable to write on it, please consult with the school and either receive another survey form or respond using the online survey form.

Q3 I answered the 1st submission using a paper survey form, but is it okay to answer the 2nd submission using the online survey form?

A That is not a problem. As long as you respond using either a paper survey form or the online survey form for all three submissions, they will be counted.

If responses for the same survey submissions are provided both using a paper survey form and the online survey form, in principle, the answers to the online survey form will be used.

Q4 Do I need to include consumption tax when filling out the survey form?

A That is correct. You do not need to exclude the consumption tax, so just respond with the amount spent from your household.

Q5 I made payments using a credit card (in multiple installments), and the expenses span across the submission periods for the 1st and 2nd installments. How should I answer?

A Please enter the full amount in the month the purchase was made. For example, when purchasing an item for 10,000 yen in April in 5 installments, please record the full 10,000 yen in April instead of recording 2,000 yen each from April to August.

Q6 I purchased items to use in class at a low price at a flea market. In this case, do I need to convert the amount to the list price and write it down?

A You do not need to modify the amount. Please enter the actual amount you paid.

Q7 Where should I record the purchase cost of educational books for parents and the participation fee for parent seminars?

A You should not include those expenses. It is not directly related to your child's education and is for parents, so it is not a target of the survey.

Q8 How should I record the cost of bicycles purchased for transporting children to and from kindergarten?

A Please fill in "A-7-a Transportation expenses, bicycle costs, etc." Please note that the cost of bicycles used for everyday play by your child (not for commuting to school) is not a target of the survey.

Q9 I drive my own car to drop off and pick up my children from school. The car is also used for other purposes. How should I answer for gasoline costs in this situation?

A Please fill in "A-7-a Transportation expenses, bicycle costs, etc." to the best of your knowledge. The gasoline costs paid solely for commuting to and from school can be roughly calculated by multiplying the distance from home to the school by the gasoline unit price, and then multiplying it by the number of days commuted to the school.

Please answer the relevant item "B Other outside school expenses" if you are your car for transportation to lessons.

Q10 There are experiential learning and training sessions organized by kindergartens and schools, where only those who wish to participate can join. How should I answer for these participation fees?

A Please fill in "A-6 Extracurricular activities costs." However, activities not organized by kindergartens or schools (even if they take place at kindergartens or schools but are organized by private businesses, etc.) are considered lessons, so please select the relevant item in "B Outside school expenses."

Q11 School event (sports day, etc.) photos were posted, and I ordered and purchased the photos. How should I answer for this expense?

A Please fill in "A-8 Others." Even if parents order individually through online shops, the commemorative photos related to school events are targets of the survey.

Q12 How should I answer about text costs?

A Please answer by dividing the costs based on the contents included in the text costs. For example, if the text costs include workbooks and science experiment costs, please enter the amount for workbooks under A-1 Textbook cost, cost for books used in class" and the amount for science experiment costs under "A-5 Experiential learning costs.

Q13 I am using an after-school childcare program. How should I answer for related expenses?

A There are various ways to spend time after school, so it is necessary to make judgments based on the actual situation. For example, if there are strong educational elements such as setting aside study time for everyone to do homework or self-study together, please record it under "B-2-e Expenses related to cultural attainments, others." Programs specialized in childcare elements do not fall under educational expenses, so there is no need to include them in your response to this survey.

Q14 There is optional insurance for compensation for accidents within the school, and the school is collecting insurance premiums. How should I answer for this premium?

A If it is optional, please fill in "A-8 Others." Furthermore, if enrollment is conducted for all students at school rather than on a voluntary basis, please fill in "(B)-7 Other school payments" on the frontside of the 3rd submission survey form, and filling out the backside of each survey form is not necessary.

Q15 I purchased a tablet computer for studying at home. How should I answer for this expense?

A Please specify the main purpose of equipment such as computers that have a wide range of uses, and fill in the item for that main use. For example, a tablet purchased mainly for home learning purposes falls under "B-1-a Home learning costs." Furthermore, dedicated tablets for on-line classes falls under "B-1-b On-line classes, home tutor expenses." The cost of purchasing software or apps should be determined separately based on their respective purposes.

Q16 How should I answer questions about the costs of English proficiency tests and bookkeeping certification exams?

A Please fill in "B-2-e Expenses related to cultural attainments, others." The same applies to students who take group tests at school if their families pay for it.

Q17 When the same sports equipment are used for both school classes and club activities, how should I answer?

A Please fill in item for how it is used primarily. In school classes, please record expenses under "A-3 Physical education supplies," and for club activities, please record them under "A-6 Extracurricular activities costs."

Q18 This winter, my child will be applying to high school. Do I need to fill in all the costs for the cram school expenses, mock test fees, expenses on the day of the entrance exam (such as exam fees and meal costs), and the entrance fee for the high schools they passed, during the period leading up to the entrance exam?

A Please fill in the expenses paid for learning activities this year (cram school expenses, mock test fees, etc.). Expenses paid on the day of the entrance examination (such as examination fees) and beyond are related to the learning activities of the following academic year and are therefore not a target of the survey. Please do not include them in your answer.

Q19 At school, all students took a mock test organized by a prep school. How should I answer for this expense?

A Please fill in "B-1-d Supplementary learning expenses - Others." The school only provides a venue for mock tests and they are not part of the curriculum.

Q20 The school has supplementary classes separate from the regular curriculum, and students pay for supplementary classes. How should I answer for this expense?

A Please fill in "B-1-d Supplementary learning expenses - Others." Supplementary classes are not part of the regular curriculum and their implementation varies by school, so they are treated as extracurricular activities costs.

Q21 In order to get to know the atmosphere of the university before taking the exam, I paid for transportation expenses to visit the university. How should I answer for expenses related to transportation, etc.?

A If your family's voluntary chose to visit the university, please fill in "B-1-d Supplementary learning expenses - Others." Please enter the cost of activities such as campus tours conducted under the supervision of the school in "A-6 Extracurricular activities costs."
