KBCC

Admission Guide for International Students 2026

SCHOOL INSTITUTION of KYUSHU SOGO GAGUIN
Kagoshima College of Computer Business and Public Service

KBCC is a place where "I want to find a job" can come true!

Take the first step towards your dreams at KBCC!!

About KBCC

Kagoshima College of Computer Business and Public Service (KBCC), established in 1987 with the approval of the Governor of Kagoshima prefecture, is a vocational school with a long history and proven track record in business education. Located in Kagoshima City in southern Kyushu, the climate is mild and comfortable. Situated in the most bustling area of Kagoshima Prefecture, it offers convenient access to transportation, shopping, dining, part-time jobs, and leisure activities.

International Business: Highlights

The "International Business Department," established in 2019, is a specialized course for international students who aim to work in Japan. In two years, students will gain knowledge and skills in their specialized field, as well as Japanese language and communication skills. Upon graduation, students will receive the "Diploma" qualification and aim to find employment in companies.

Japanese Language: Highlights

Students develop Japanese proficiency through balanced training in listening, speaking, reading, and writing. They also receive career guidance to enter their desired graduate school, university, or vocational school.

Principal's Greeting

Slowly, steadily, surely.

Many international students study at KBCC. Student life at KBCC is fulfilling, with classrooms filled with smiling students, energetic school events, and career counseling sessions with teachers who have a serious look in their eyes. All of our faculty and staff are looking forward to your enrollment.

Yoshitaka Nakahiro, Principal of Kagoshima College of Computer Business and Public Service

Successful Graduates

KBCC graduates are active in various business settings. They contribute to society by utilizing the knowledge and skills they acquired in their specialized courses.

Pick-up Curriculum

IT Courses

Programming (Python, Java, etc.), CAD Practice, Web Design, System Construction, IT Literacy, IT Management, Office Software, etc.

Your Own Laptop

A brand-new, highperformance laptop will be lent to each student. You can use the same PC until graduation, with a full internet environment and perfect Wi-Fi connection!

State-of-the-art Facilities like an Office!

-Mac Room---

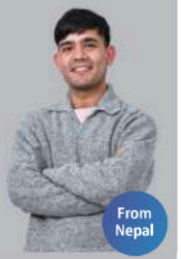

The newly established large PC space with 40 iMac 24s is designed with a desk layout that simulates a company or office, allowing for efficient and effective classes and presentations.
Part of the classroom has a meeting space where you can have flexible meetings and conferences with friends like in a modern office.

Student's Voice

KBCC offers a very supportive learning environment, and thanks to the teachers' kind support, my student life is fulfilling.
Living costs in Kagoshima are lower than in big cities, so I can really focus on my studies.
In the future, I hope to work in the IT field as a bridge that connects Japan with the rest of the world.

ACHARYA GOVINDA PRASAD

Teacher's Voice

The power of all of you foreigners is indispensable for Japanese society in the future.
We will cultivate not only the basic knowledge required by society, but also the human power that can cope with all aspects of business.

Mr. Tomitani

IT Companies in Kagoshima

There are more than 130 IT and Web companies, so-called IT companies, in Kagoshima Prefecture. This number is increasing. The business content of each company is also diverse. Many companies are actively involved in internships and company visits, making it easy to find a job in Kagoshima.

International Business Department (2-year program)

International Hotel & Tourism

Aim for a Hotel Career!

This course is designed for students who want to work in the tourism industry, especially hotels. Students will study hotel-specific subjects, languages, and IT basics.
In hotel-specific subjects, students will learn practical skills for working in hotels, such as accommodation operation practice and manners/protocols.

Student's Voice

I'm not very good with big cities, so I chose KBCC in the comfortable, easy-to-live-in city of Kagoshima. This is my first time studying hotel business, but I try to speak using polite language.
Let's work hard together so that all of us can become excellent members of society!

PARIYAR SHILA

Teacher's Voice

We will support you so that you can become loved and needed as a member of Japanese society. Let's learn business skills and manners at KBCC to make your dreams and goals come true.

Programs

We provide fun and thorough instruction in practical Japanese that is necessary not only for exam preparation but also for further education and daily life. Each class is taught by multiple teachers, and lessons are tailored to the level of each learner.

Morning Class 9:15~12:40 (4 hours of classes per day (Monday - Friday))

Afternoon Class 13:30~16:50 (4 hours of classes per day (Monday - Friday))

3 Highlights

1 High-Quality Japanese Language Education

We provide high-quality Japanese language education with an emphasis on developing communication skills by experienced instructors.

2 Career Support

We provide career path support tailored to the needs of each individual.
You can also receive a tuition fee reduction if you go on to a group vocational school.

3 Lifestyle Support

Our dedicated staff will support you with your life in Japan and manners, so you can rest assured. We also have student dormitories, making it easy to enter Japan and start your student life.

Pick-up Curriculum

Textbook

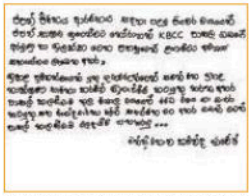

We use the "Dekiru Nihongo" textbook. Let's develop the four skills of listening, speaking, reading, and writing in a well-balanced manner.

Class Teacher System

Your class teacher will support your Japanese language learning. Please feel free to consult with them about your classes and anything else!

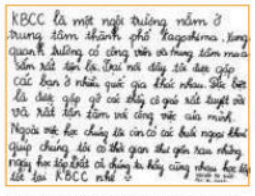

Student's Voice

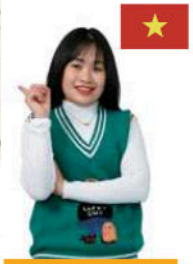

As your first step to life in Japan, KBCC will support you in achieving your goals. The teachers' classes are very easy to understand, and there are also events such as extracurricular activities and field trips. Let's enjoy a meaningful school life together at KBCC!

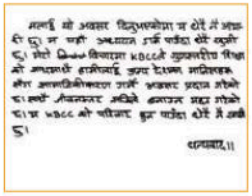

MANSURI WITHANA KAVINDA HIMESH

KBCC is a school located in the center of Kagoshima City. With parks and shopping centers nearby, it's a very convenient place. Through my studies and school events, I've been able to meet friends from many different countries and passionate, wonderful teachers. Let's study together at KBCC!

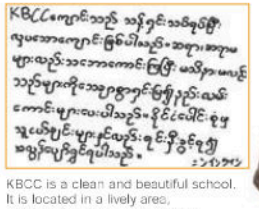

NGUYEN THI TUYET

I'm very happy to be able to study at KBCC. KBCC not only provides a high-quality education, but also offers many opportunities to improve our standard of living and to experience international exchange. I'm truly glad to be a member of the KBCC family!

JIMBA MOHAN

KBCC is a clean and beautiful school. It is located in a lively area, which makes it very convenient. The teachers' lessons are easy to understand, and they carefully guide each student. There are also chances to make friends from all over the world, so studying abroad here is a lot of fun.

NIN IN LAIN

Teacher's Voice

What made you want to study Japanese?
I think each of you has a dream or goal for the future. We will do our best to help you so that you can get closer to the "you you want to be"!

Ms. Tanaka

I think you all have dreams you want to fulfill. In order to make those dreams come true, please study hard. In addition to studying, please have many experiences that you can only have in Japan. The teachers are cheering for your dreams.

Mr. Chujo

International Student Support at KBCC

With KBCC's unique backup support, we provide an environment where you can easily learn and live with peace of mind.

Surrounding Areas

KBCC, located in the cultural zone of Kagoshima City, has a park in front of it, as well as many facilities such as art museums and museums. It is a convenient location for going anywhere.

Time Required from Kagoshima Airport

- Bus to Kagoshima City: 40 minutes

Time Required by Kyushu Shinkansen

- Fukuoka ↔ Kagoshima: Approximately 1 hour 30 minutes
- Kumamoto ↔ Kagoshima: Approximately 1 hour

Time Required from Major City

- Tokyo (Haneda): 1 hour 55 minutes
- Osaka (Itami): 1 hour 15 minutes

Central Park

It's right in front of the school and is a relaxing space for everyone! On sunny days, have a picnic lunch with your friends!

CenTerrace TENMONKAN

5-minute walk from KBCC! There are shops, restaurants, and everything else you need! You might even be able to get a part-time job at a fashionable store!

Terukuni Shrine

It's the largest shrine in Kagoshima City and is dedicated to Lord Shimazu Nariakira, the guardian deity of the area. Be sure to visit and pay your respects!

Tenmonkan Cinema Paradise

It's next to the school, so you can go see the latest movies after school! Let's go with your friends!

Support System

KBCC provides full support for your life in Japan. We have teachers who can speak various languages, so even those who are not confident in Japanese can live with peace of mind.

Mr.TOKUMINE

Ms.IKE

Ms.KOMIZO

K·A·T·C PRIDE

Let your skills support the world.

It has been about 140 years since Karl F. Benz in Germany invented the world's first gasoline-powered three-wheeled car in 1886.
Today, cars are an essential part of our lives. It is said that the automobile industry is now undergoing a once-in-a-century major transformation.
With the rise of electric vehicles, advances in self-driving technology, and the IoT of vehicles, cars of the future will look very different from those of today. However, no matter how much cars evolve, without mechanics who can properly inspect and maintain them, we cannot protect the safety of cars and people. At Kyushu Koka, which has the longest history among automobile technical colleges in Kyushu and strong trust from the industry, acquire the skills to support the world!

3 Promises from KYUSHU AUTOMOBILE TECHNICAL COLLEGE

1 Thorough training to become work-ready professionals demanded by society

2 Full support for each student's dream = successful employment

3 Comprehensive guidance to obtain advanced qualifications that last a lifetime

KYUSHU AUTOMOBILE TECHNICAL COLLEGE in Numbers

71 years
since founding
The automobile technical college ith the longest history in Kyushu

Founded in 1953, our school has 71 years of history and achievements as a technical college training automobile mechanics.

Approx. 7,500
graduates
Alumni are active at dealers across Japan.

Over 71 years we have produced about 7,500 automobile mechanics, and our graduates are active all over Japan.

Over 9
qualifications can be obtained while you are enrolled.

In addition to the Class-2 Automobile Mechanic (Comprehensive) [National Qualification], you can obtain many other certifications that will be useful once you start working on site.
By studying for these certifications, you can further sharpen and develop your skills.

In 2 years
you can become an auto mechanic.

If you aim to become an auto mechanic without attending a vocational college, you will need many years of practical work experience as well as a Class-3 Automobile Mechanic certification.
Even though it normally takes at least four years, at our college you can take the exam in just two years.
We also offer strong support to help you obtain your qualifications.

Employment rate
100%
(March 2025 graduates)

The employment rate for students graduating in March 2025 is an outstanding 100% Thanks to our strong connections with the automotive industry and our comprehensive career support—such as career counseling and job guidance that begin in the first year—about 90% of our students are hired by their first-choice companies.

Jobs-to-applicants Ratio
59.4 to 1

Employment rate within Kumamoto
65.2%
(March 2025 graduates)

The number of job openings per student is an impressive 59.4 to 1! Since the figure was 62.7 to 1 for students graduating in March 2024, we have maintained a high job-opening ratio for two years in a row. Our graduates have traditionally had strong employment results within Kumamoto Prefecture as well. Of course, we also provide thorough support for students who wish to find jobs outside the prefecture.

60%
of students come from general high schools

About 60% of our students had never worked on a car before enrolling. You can feel confident, because we teach everything carefully from the basics, including how cars work and how to use tools. Starting from zero, you will gain all the essential knowledge and skills needed to become a Class-2 Automobile Mechanic.

Convenient location
about a 10 min
walk from the nearest station

Our campus is in an excellent, easy-to-access location: about a 10-minute walk from JR Heisei Station and about a 15-minute walk from JR Kumamoto Station. Because we are close to downtown Kumamoto, it's easy to hang out with friends or work a part-time job after class, so you can enjoy a fun and fulfilling student life.

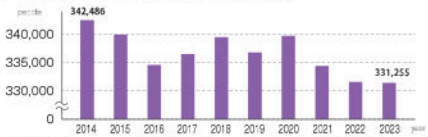

The Present and Future of Automobile Mechanics

Automobile mechanics are a profession that will never disappear.

In recent years, with the arrival of new types of vehicles that incorporate IT-such as hybrid cars and electric vehicles -the automotive world is said to be entering a period of global transformation. The mainstream may shift away from traditional gasoline cars, but as long as cars continue to exist, the work of auto mechanics will not disappear. From now on, there will be a growing demand for auto mechanics who can respond to the times by handling IT-based and computerized vehicle systems.

Around 11,200 fewer in 10 years!
The shortage of auto mechanics is getting worse.

■ Trend in the number of auto mechanics

In 2014, there were 342,486 auto mechanics, but by 2023 the number had fallen to 331,255-a decrease of about 11,200 over 10 years.
Data also shows that more than half of maintenance workshops feel they are "short of staff," so the shortage of auto mechanics is becoming a serious problem.

Prepared based on the Japan Automobile Service Promotion Association Federation (2024), "Overview of the Survey Results on the Actual Conditions of Certified Automobile Maintenance Businesses."

The effective job openings-to-applicants ratio is about 3.9 times the average for all industries!

○ FY 2023 (Reiwa 5)

Auto mechanic job ratio
4.99 to 1

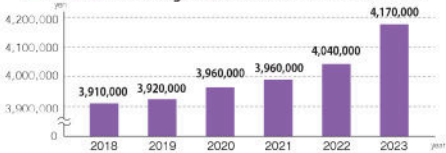

All-industry job ratio
1.29 to 1

An effective job openings-to-applicants ratio of more than 1 means that there are more job openings from companies than there are people who want to work. While the average effective job openings-to-applicants ratio across all industries is 1.29, for auto mechanics it is 4.99-about 3.9 times higher than the average, which is a very high figure. This shows that there is a significant shortage of people who want to work compared to the number of positions companies are offering, and that auto mechanics are in very high demand.

Prepared based on Ministry of Health, Labour and Welfare (2024), "Occupational Information Website" and "General Job Placement Status."

The average annual income of auto mechanics is rising every year!

■ Trend in the average annual income of auto mechancs

The average annual income rose from 3,920,000 yen in 2019 to 4,170,000 yen in 2023, an increase of 250,000 yen over 5 years. Given that the demand for auto mechanics remains consistently high, the average income is expected to continue increasing in the future.

2-Year Program Male/Female

Automotive Maintenance Department

Pass rate for the Class-2 Automobile Mechanic Certification Exam within Kumamoto No.1

Employment rate 100% Jobs-to-applicants Ratio 59.4 to 1

You will gain a solid understanding of basic automobile structures and acquire job-ready knowledge.

With thorough instruction tailored to each student's level, you can learn everything from the basics, such as automobile structures, to advanced knowledge like maintenance-related laws and regulations.
We place a strong emphasis on practical training, so you can refine your skills through plenty of hands-on practice time.
Because we use a homeroom teacher system, you can feel comfortable consulting us about anything—from classes and employment to qualifications and even your private life—allowing you to enjoy a secure and fulfilling student life.

Learning Points

No problem even from zero! Learn from the basics and master advanced knowledge.

To answer the question "How is a car built?", learning starts from studying body mechanisms and structures, and the types and formats of engines.You then advance step by step to learn more advanced knowledge such as automotive dynamics and laws related to automobile maintenance.

A total of 1,320 hours of practical training over 2 years! Gain truly job-ready skills.

The total number of practical training hours required by the Ministry of Land, Infrastructure, Transport and Tourism to become an auto mechanic is 1,200 hours. Our college offers 1,320 hours of practical training, far exceeding this requirement. Through extensive hands-on practice, you will hone your skills and gain the ability to work as an immediate asset in the industry after graduation.

You can learn from instructors who have worked at a wide variety of car dealerships.

Our teachers have experience working at a variety of dealerships, including Toyota, Nissan, Mazda, and others, so you can learn knowledge based on real-world experience.
One major advantage is that you can also learn the unique characteristics and "quirks" of each manufacturer, which differ slightly from dealer to dealer.

Current Student Interview

I can learn not only the basics but also the latest maintenance technologies.

The teachers here are generally quite young, so they teach us the newest maintenance techniques and are always willing to listen to our concerns. I really appreciate that. My goal is to join Kumamoto Toyota Motor Co., Ltd. in the future and obtain Toyota Certification Grade 1, which represents the highest level of Toyota engineers. To achieve this, I want to study hard and make the most of my time at this school.

Yamaguchi Ukito

1st year, Automotive Maintenance Dept. (Kaishin High School)

[Theory Classes]

We provide thorough, level-appropriate instruction for each student, mainly in the mornings. Starting from understanding automobile structures, you will firmly learn all the knowledge required to become an auto mechanic.

[Lunch Break]

There are restaurants and convenience stores nearby, and students are free to go out.
A lunchbox vendor also comes to school every day with a different bento menu.

[Practical Training]

By using tools to actually work on training vehicles—such as taking them apart and reassembling them—I can deepen my understanding.

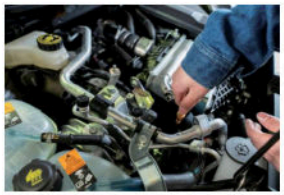

Curriculum

	1st-year (First Semester)	1st-year (Second Semester)	2nd-year (First Semester)	2nd-year (Second Semester)
Theory Classes	Engine 1 Chassis 1 Electrical Components 1 Vehicle Dynamics & Mathematics 1 Automotive Fundamentals 1 Basic Maintenance Maintenance Equipment	Basic Engineering HV Engine 2 Chassis 2 Electrical Components 2 Vehicle Dynamics & Mathematics 2 Automotive Fundamentals 2	Engine 3 Chassis 3 Electrical Components 3 Vehicle Dynamics & Mathematics 3 Fault Diagnosis 1 Laws and Regulations Related to Automobile Maintenance	Engine 4 Chassis 4 Electrical Components 4 Vehicle Dynamics & Mathematics 4 Fault Diagnosis 2 Vehicle Inspection
Practical Training	Engine inspection, disassembly, assembly, adjustment, and testing Measurement work	Chassis inspection, disassembly, assembly, adjustment, and testing Electrical system inspection, disassembly, assembly, adjustment, and testing	Engine inspection, disassembly, assembly, adjustment, and testing Chassis inspection, disassembly, assembly, adjustment, and testing	Electrical system inspection, disassembly, assembly, adjustment, and testing dentifying causes of faults Inspection work

With a curriculum designed to support complete beginners, you will learn the basics of automobile maintenance.

You will learn more advanced knowledge and skills and strengthen your practical abilities.

Pick-up Curriculum

Engine Inspection

You will remove parts as you work, while learning and understanding the structure and mechanisms of each component.

Measurement Work

You will remove the engine from an actual vehicle, disassemble it, take measurements, reassemble it, and then restart it.

Inspection Work

You will carry out inspections and checks—the first step in troubleshooting—and develop the skills required of an automotive mechanic.

Vehicle Dynamics

You will study the principles and structure of automobiles in depth, including basic electrical and electronic knowledge and fundamental theories, to build specialized understanding of vehicle dynamics.

Visiting Lecture (Special Class)

Representatives from automotive dealerships will visit our school and current mechanics will give lectures on the latest technologies.

Balance between Theory Classes and Practical Training

Practical Training makes up 70%! You'll steadily build real skills!

Internship

You can participate in an internship lasting about one month during the period from October to December of your first year. You can choose from options such as dealerships and automotive repair shops, and through the internship you will not only greatly improve your technical skills but also boost your motivation by seeing professional mechanics' work up close. It can also help you start thinking more concretely about your future career path.

Selecting an Internship Placement

You can choose an internship placement from the information materials sent to the school. You can also ask the school to approach a company you would like to intern with.

Meeting with Your Teacher

Through a meeting with your teacher, you will learn what to keep in mind while working at your internship placement.

Internship

By observing professional mechanics' skills up close and receiving their advice, you will significantly improve your technical abilities.

Back to Regular Classes

By experiencing the workplace firsthand, you will clearly see what you still need to improve and be able to approach your classes with even greater motivation.

Report Submission

You will write a daily report at your internship site. You will submit the reports to the school at the beginning of each week.

Teacher Visits to Internship Sites

Teachers visit each company to check in with students, listen to any problems or concerns, and provide support.

Iori Itasaka
1st-year
Graduated from Kumamoto Prefectural Amakusa Technical High School

During my internship, I helped with the 12-month inspection, oil changes, light checks, tire rotation, bumper replacement, and more. The staff kindly taught me each task carefully, so I was very grateful.

(Itasaka's internship placement)
Honda Mobility Kyushu Co., Ltd.

A Honda authorized dealer headquartered in Fukuoka City, Fukuoka Prefecture, operating across the entire Kyushu region.

Hayato Kawakami
1st-year
Graduated from Kumamoto Municipal Chiharadai High School

Before the internship, we studied the contents of daily inspections and the names of various parts in class. Thanks to that, I was able to do a lot of hands-on work at my internship site. I want to make use of what I learned in the internship after returning to school as well.

(Kawakami's internship placement)
United Toyota Kumamoto Co., Ltd.

With many locations across Kumamoto Prefecture, the company also operates dealerships for Lexus and Volkswagen

In-school Skills Competition

This is an in-school skills competition where students are evaluated on whether they can accurately perform the six-month inspection conducted six months after a new car is purchased—checking for any failures or issues—as well as on their ability to detect problems, use diagnostic equipment, and more. Company representatives are also invited, and the event is held on a grand scale.

Six-Month Inspection Practical Test

You will demonstrate the results of your daily learning. Company representatives and teachers will conduct strict checks and evaluations.

The competition is held in pairs.

It is important to communicate well with your partner and work efficiently without unnecessary movements.

Winners will be recognized with awards!

There are prizes for 1st to 3rd place, as well as a Special Jury Prize. Congratulations to everyone who placed!

Masaki Takemori
Automotive Maintenance Dept., 2nd-year
Graduated from Kumamoto Prefectural Kumamoto Nishi High School

When I was selected to compete in the contest, I was told that representatives from the company where I have a job offer would also come to watch, so I was filled with both nervousness and motivation. My partner and I practiced together, and at first we weren't in sync and sometimes clashed. However, each time that happened, we talked things through carefully—such as what we wanted from each other—and by eliminating misunderstandings, we started to see improvements in our time and results. On the day of the competition, I gave it my all and was able to finish with no regrets. I want to value what I learned through this contest and apply it in my work.

INTERVIEW

Automotive mechanics have an important and rewarding job, as they are entrusted with people's lives.

In the future, I hope to join a dealership, sharpen my maintenance skills, and eventually take on new challenges such as sales. To make that happen, I make sure to fully absorb what I learn in class and actively pursue any qualifications I can earn while I'm a student. I believe automotive mechanics will always be needed as long as there are cars in the world, and it's an important and rewarding job because you are entrusted with people's lives. If you love cars, come to Kyushu Automobile Technical College and aim to become an automotive mechanic!

Kento Shimada
Automotive Maintenance Dept.
1st-year
(graduated from Buntoku High School)

With plenty of practical training, you can learn efficiently and gain a deeper understanding.

Thanks to the many hands-on training sessions, even things that were hard to understand just by reading the textbook in theory classes become much clearer when you learn by seeing the real thing. In practical training, you can learn by actually working with your hands—disassembling and assembling car parts and taking measurements—so it's a lot of fun. The teachers are kind and will keep explaining until you understand, so even if you're not confident in studying, I think this is the best environment to learn with peace of mind.

Shogo Tsutaka
Automotive Maintenance Dept.
1st-year
(graduated from Kumamoto Prefectural Yatsushiro Technical High School)

I want to become an automotive mechanic that people say, "I want Sunahara to handle it."

I wanted to become an automotive mechanic, so I consulted my high school teacher, who recommended Kyushu Koka to me. After attending an open campus, I saw that the practical training facilities were well equipped and kept neatly organized, and I felt I could learn properly here, so I decided to enroll. Everyone in my class gets along well, and we learn in a friendly, fun atmosphere. In the future, I want to become an automotive mechanic who stays close to customers—someone who is requested by name by repeat customers.

Mitsuki Sunahara
Automotive Maintenance Dept.
1st-year
(graduated from Kumamoto Prefectural Ogawa Technical High School)

Message from the Teachers

Mr. Takehiro Nishimoto
I have experience at a Nissan-affiliated dealer, and I'm especially skilled at disassembling and replacing engines and transmissions!

Mr. Mitsuhisa Tsutsumi
I come from a Mitsubishi Fuso-affiliated dealer, and I always try to teach from the students' point of view.

Mr. Soichiro Yoshimura
I have experience at a Toyota-affiliated dealer and am in charge of international students. Every day, I work to make my classes easy for international students to understand.

Mr. Taiyo Hashima
I come from a Nissan-affiliated dealer. At the dealership, I ranked No. 1 in sales of parts such as tires and batteries among all employees for 6 years in a row!

Mr. Takehiro Nishimoto
Nissan-affiliated dealer background
[What I value in teaching]
As a mechanic with real on-site experience, I make sure to teach repair techniques, knowledge, and tips that you won't find in textbooks.

You can experience real-world maintenance work using training vehicles that are updated every year.

When I was a new mechanic, I was afraid of doing maintenance work, and I decided to become a teacher because I want to reduce the number of students who graduate without confidence like I did. At KYUSHU AUTOMOBILE TECHNICAL COLLEGE, the training vehicles change every year, so you can experience a wide variety of maintenance work that you wouldn't be able to do at other schools and develop strong practical skills. Also, all of us teachers, including myself, really love cars, so I think you'll enjoy talking with us outside of class too—whether it's getting advice about your own car or just chatting about cars for fun.

Let's enjoy auto maintenance and build up your skills.

I also graduated from KYUSHU AUTOMOBILE TECHNICAL COLLEGE, and I became a teacher because I want to share with students how fun and profound auto maintenance can be. At Kyushu Automotive, the distance between teachers and students is very small, so you can enjoy a really fun student life. If you like cars or motorcycles, you'll find many friends who share your interests, and I'm sure your days off will also be fulfilling—going for drives or touring together. Let's study together here at our college!

Mr. Taiyo Hashima
Nissan-affiliated dealer background
[What I value in teaching]
I try to make my classes fun and engaging so that even students who chose this path without a clear goal can come to love cars.

Mr. Nishimoto's car
Mazda "RX-7"
I love this car's retractable headlights and its unique rotary engine sound, and driving it along the Aso Milk Road in Aso is the best.

Mr. Hashima's car
Toyota "GR86"
I've been driving sports cars since my student days. My hobby is taking part in car drifting competitions, and I share the fun and excitement of motorsports with my students.

KATC

Qualifications

With strong support, we achieve a high national exam pass rate every year.

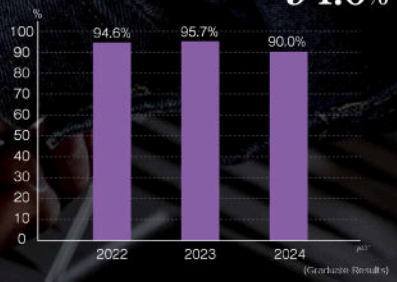

Class 2 Automotive Mechanic (Gasoline & Diesel)
[National Qualification]

90.0%

(Out of 60 March 2024 graduates who took the exam, 54 passed.)

Class 2 Automotive Mechanic (Gasoline & Diesel)
[National Qualification] 3-Year Pass Rate

Average National Exam Pass Rate Over the Past 3 Years **94.6%**

In addition to automotive mechanic qualifications, you can earn a wide range of certifications useful in the workplace.

Non-Life Insurance Solicitor Qualification **91.7%**

(Out of 60 examinees, 55 passed.)

This exam assesses whether you have the knowledge needed to accurately explain important information about non-life insurance products at non-life insurance agencies, financial institutions, and other organizations.

Used Car Appraiser (Light Vehicles) **70.6%**

(Out of 17 examinees, 12 passed.)

This qualification is used to assess and determine vehicle prices when buying cars or conducting trade-in appraisals. In recent years, it has gained attention as a specialist certification for professionals who can evaluate the quality of used cars and judge their proper value.

Arc Welding Special Training [National Qualification] **100%**

(Out of 19 examinees, 19 passed.)

This certification shows that you have completed the special training required for work involving arc welding, which is widely used and considered a standard method for welding many types of metals.

Hazardous Materials Handler License [National Qualification] **50.0%**

(Out of 2 examinees, 1 passed.)

This is a national qualification that allows you to handle flammable hazardous materials specified under the Fire Service Act as part of your work.

National Qualification

Gas Welding Technician **100%**

(Out of 5 examinees, 5 passed.)

Forklift Operation Skills Training Course **100%**

(Out of 1 examinee, 1 passed.)

National Qualification

Organic Solvent Work Supervisor **100%**

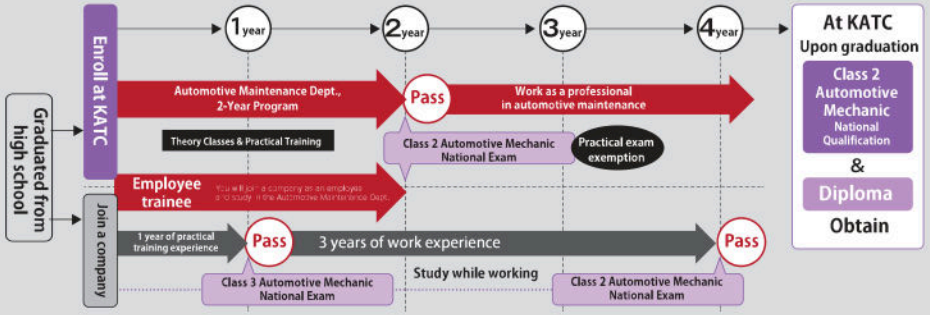

(Out of 1 examinee, 1 passed.)

Low-Voltage Electrical Work Special Training **100%**

(Out of 58 examinees, 58 passed.)

(March 2024 Graduate Results)

You can obtain the Class 2 Automotive Mechanic qualification in as little as two years.

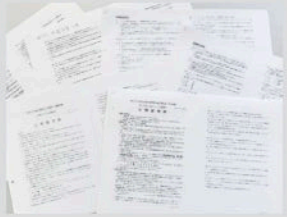

If you aim to become an automotive mechanic without attending a vocational school, you generally need a long period of work experience and the Class 3 automotive mechanic qualification. While it can take at least four years by that route, at Kyushu Automobile Technical College you can take the exam in just two years.

Comprehensive support to help you obtain national qualifications.

01 From the second semester of Year 2, classes shift to a national-exam-focused curriculum.

By the end of the first semester of Year 2, you will have completed all coursework required for the Class 2 Automotive Mechanic national qualification. In the second semester, you will take repeated mock exams during class, and instructors will thoroughly support you by focusing on your weak areas and any points you don't understand.

02 Teachers assess each student's skill level and reorganize classes by proficiency for more effective instruction.

Before the second semester of Year 2 begins, you will take a mock exam. Based on the results, classes are reorganized by proficiency level, and efficient, personalized exam preparation is provided.

03 Mock Exams Designed to Simulate the Real Test

With a proud 71-year history, our school has a vast collection of past exam questions. Teachers who are highly familiar with the national exam analyze this year's trends and share them with students.

Thanks to the school's strong support, I was able to obtain the Class 2 Automotive Mechanic national qualification.

Employer **Nissan Prince Kumamoto Sales Co., Ltd.**

Hikaru Oikebe (Graduated March 2018)

At Kyushu Automobile Technical College, I not only solved past national exam questions from the past four to five years to get used to the format, but the teachers also predicted this year's exam topics and worked out trends and strategies to guide us toward passing. Thanks to their support, I'm now able to do the job I dreamed of since childhood—working with cars. Going forward, I want to keep working hard to become an even better automotive mechanic by aiming to earn qualifications such as Vehicle Inspector and Class 1 Automotive Mechanic.

KATC

Employment

Career Support to Help You Achieve Your Dream
Outstanding job placement results!

Employment rate

100%

The employment rate for March 2025 graduates was 100%. We have achieved a 100% employment rate for two consecutive years, in both 2024 and 2025.

Employment rate within Kumamoto

65.2%

Through strong partnerships with local companies and a network of graduates active across Kumamoto Prefecture, we achieve excellent job placement results within Kumamoto.

First-choice employment rate

Approx. **90%**

Thanks to our comprehensive internship program and strong job placement support, many students receive job offers from their first-choice employers.

Jobs-to-applicants Ratio

59.4 to 1

We maintain a very high job-offer ratio every year. For March 2025 graduates, this means that each student received job openings from about 60 companies on average.

2023	2024	2025
30.3 to 1	62.7 to 1	59.4 to 1

Number of job openings

3,600 job openings

There are many job openings not only in Kumamoto but also across the Kyushu prefectures and throughout Japan, including the Kanto region. You can find employment with the company and in the area you want.

Message from Employers

Build a Career and Succeed as an Automotive Mechanic

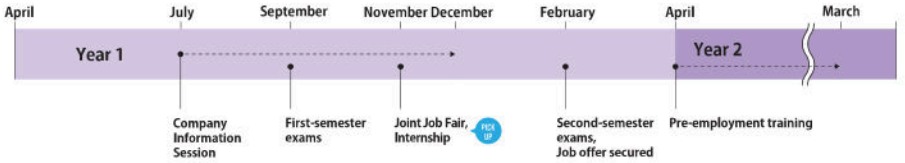

Automotive mechanics are expected to have advanced technical skills, flexibility, and the ability to provide courteous service to customers. Graduates of Kyushu Automobile Technical College are already working as immediate assets, backed by strong knowledge and skills, including national qualifications. If you enjoy working with machines and love cars, we encourage you to choose this path. At our company and our group company, Toyota L&F Kumamoto, we have introduced a company-sponsored trainee employee program. We look forward to welcoming motivated people who are eager to grow and can adapt to the changing automotive industry!

Kumamoto Toyota Motor Co., Ltd.
General Affairs Dept.
Section Manager
Maki Miyamoto

Job Placement Support

Through individual meetings, we confirm each student's preferred career path and desired employer and provide career guidance. We also offer company information sessions and joint job fairs, as well as detailed support such as help with writing resumes, one-on-one interview practice, and mock written exams.

PICK UP

Joint Job Fair

Many companies seeking automotive mechanics—such as car dealerships and service companies in Japan and overseas—take part. In a booth-style format, you can speak directly with recruiters and senior employees from the automotive industry.

Internship

Through internships at dealerships and auto repair shops, you can experience the workplace firsthand and reduce mismatches after getting a job. In many cases, students' hard work during the internship is recognized and leads to a job offer.

Job Offer Recipient Profiles

Nissan Prince Co., Ltd.

I earned multiple qualifications that gave me an edge in job hunting!

Kyoshiro Takato

2nd-year
Graduated from Shogakkan High School

I believed that earning morequalifications would be advantageous when job hunting, so while working hard on my daily studies, I obtained certifications such as Arc Welding Special Training and Used Car Appraiser (Light Vehicles). Thanks to that, I was able to approach my job search with confidence.

Honda Mobility Kyushu Co., Ltd.

I received a job offer from my first-choice company.

Kazuki Ikeda

2nd-year
Graduated from Kumamoto Prefectural Mifuno High School

During my job search, I was grateful that interview coaches from outside the school came to provide guidance, and that the teachers also summarized the characteristics of each company and taught us clearly. I'm truly excited to be able to work with cars—something I've dreamed of since I was a child!

United Toyota Kumamoto Co., Ltd.

I want to become someone who is relied on and trusted.

Kaito Yokota

2nd-year
Graduated from Buntoku High School

I'm sincerely grateful for the teachers strong support, starting with help in creating my resume. At my workplace, I want to become fully independent as soon as possible, and when I have juniors someday, I want to be someone they can learn from.

Graduate Profiles

United Toyota Kumamoto Co., Ltd.

Inspired by my father to become an automotive mechanic.

Mioha Sakamoto

Graduated March 2023

By taking initiative, I often notice things I wouldn't have otherwise, and that leads to new opportunities to challenge myself and grow. Seeing customers smile and hearing them say, "I'll count on you again," is what makes my work rewarding.

Suzuki Jihan Kumamoto Co., Ltd.

I want to become a mechanic customers request by name.

Hideaki Furuta

Graduated March 2024

At work, I handle tasks such as vehicle inspections and shaken (vehicle inspection) maintenance, and I feel a strong sense of accomplishment when I complete difficult jobs. At Kyushu Koka, many teachers and classmates shared common hobbies with me, so I was able to enjoy a very fun student life.

Isuzu Motors Kyushu Co., Ltd.

I enjoy working every day.

Ren Matsuoka

Graduated March 2024

Since I'm still in my second year at the company, I have a lot more to learn, but I want to gain experience and become able to perform more advanced maintenance work. For that reason, I'm actively working toward earning licenses and certifications.

Two training workshops and a well-equipped hands-on learning environment

We offer an environment that supports the latest technologies, including hybrid vehicles and electric vehicles (EVs). With two spacious training workshops, there is plenty of room to practice in small teams. By working hands-on, what you learn from textbooks becomes real, practical skills you can truly master.

About a 15-minute walk from JR Kumamoto Station!

Our urban campus is within walking distance of the station, making it easy to commute. It's also close to downtown, so you can enjoy a fulfilling student life—working part-time after class or spending time with friends.

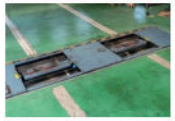

Training Workshop 1 Mainly used by second-year students. With a high ceiling, training with trucks and buses is also possible. Students practice in teams of about 5 - 6 per vehicle.

Training Workshop 2 Mainly used by first-year students. A large screen at the front allows you to practice while checking the teacher's hand movements. A total of 15 training vehicles are available.

Inspection Line
An inspection line where you can carry out the various checks required for vehicle inspection in a smooth, step-by-step process. You will learn inspection procedures and how to use the equipment.

Auto Lifts (13 units)
Equipment that lifts vehicles to make maintenance work easier. Since multiple students can work under a vehicle at the same time, it's well suited for team-based practice.

Transmission
The transmission is a core component of a vehicle and is an area where failures or abnormalities can occur. During your studies, you will gain the skills needed to inspect and repair it.

Four-Wheel Alignment Tester
A device that instantly measures wheel mounting position and alignment (direction/angles) and allows real-time adjustments.

Electric Impact Wrench
A powered tool that uses strong rotational and impact force to efficiently tighten or loosen bolts and nuts on tires and other parts.

Recommended for women who love cars, too!

My classmates and teachers are all very kind, and I'm enjoying learning here!

There aren't many female students, but our class gets along well regardless of gender, and I'm having a great student life. I especially like the practical training classes, where everyone in the group teaches and helps each other. In automotive maintenance, there aren't many tasks that require a lot of physical strength, so women can do it without any problems. We look forward to welcoming more female students!

Kana Nishizawa 1st-year
(graduated from Kumamoto Prefectural Mifune High School)

Women-Only Changing Room
This changing room is for women only. When we want to relax, we come here to eat snacks or play games.

I went to earn as many qualifications as possible while I'm in school!

After classes, I often go home and relax, but sometimes I also go out to eat with my classmates!

Annual Schedule (Automotive Maintenance Department)

~A fun and fulfilling school life with events and activities!~

In addition to studying, there are many events such as a welcome party for new students and training trips, so you can enjoy a well-balanced student life. Since you're all aiming for the same dream of becoming an automotive mechanic, you'll quickly make many friends. Let's create lots of fun memories together!

PICK UP **Welcome Party for New Students**

Apr. All new students took part in a bowling tournament. Some students even scored close to 200. It's a great way to become even closer with your classmates.

PICK UP **All-Japan Club Baseball Championship**

Jul. Our school also takes part in the top tournament in Japanese amateur baseball. In 2024, we advanced by winning the Kumamoto qualifiers.

PICK UP **Training trip (Japan Mobility Show visit)**

Nov. On the training trip to Tokyo, you will visit a mobility show. You can experience cutting-edge technology, including passenger cars, motorcycles, vehicle bodies, and parts. (Held once every two years.)

※ The trip may not be held depending on circumstances.

Taishi Yamaguchi
1st-year
Graduated from Tokai University Kumamoto Seisho High School

During breaks, we get excited talking about our favorite cars and more!

At the mobility show on our training trip, it was amazing to see the latest cars!

Yuto Takimoto
1st-year
Graduated from J ohoku High School

Some of my classmates enrolled after working as full-time employees, but everyone gets along well regardless of age!

Keito Kamahara
1st-year
Graduated from Kumamoto Prefectural Hikariyo High School

3-Year Program Male/Female

International Automotive Department

While learning Japanese and Japanese culture, you can aim to become an automotive mechanic in three years.

In the International Automotive Department, you will study automotive maintenance knowledge and skills over three years and aim to obtain the Class 2 Automotive Mechanic qualification. You will also take classes in Japanese language and Japanese culture, and the entire school will support your life and job hunting in Japan—so please feel confident about enrolling.

Key Points of the International Automotive Department

The Longest History in Western Japan

In 2016, our three-year International Automotive Department was newly established—the earliest of its kind in Western Japan.

Affordable Tuition

Compared with schools in the Tokyo metropolitan area, tuition is lower, and installment payments are also available.

Nationwide Job Placement

Our school receives job openings from all over the country, so you can also work in major cities.

LEARNING SUPPORT

1. Supportive Homeroom System

Your homeroom teacher will support you with both your studies and daily life.

2.Classes taught by professional teachers

You can learn from teachers with extensive knowledge and experience.

3.Japanese learning support

In addition to automotive maintenance classes, you will also have Japanese language classes.

Target Certifications

National qualification — Class 2 Automotive Mechanic (General) ※practical exam exempted

Other qualifications — JLPT N1 / N2; Low-Voltage Electrical Work Special Training

LIFE SUPPORT

Students from outside Kumamoto Prefecture can feel at ease, too!

1. School life support

To help you get used to life in Kumamoto—an entirely new environment—we provide a variety of support.

2. Part-time job support

We introduce part-time jobs that match your preferences, such as at gas stations, convenience stores, and restaurants.

3. Apartment guarantor support program

A guarantor is required when renting an apartment. The school supports a guarantor program so that international students can also sign a lease.

International Automotive Department (3-Year Program)

Time table

Classes are held in the morning on Mondays, Thursdays, and Fridays.

Total: approx. ¥2,185,000
(includes the admission fee and training materials fee)

Current Students

If I ever have any problems, the teachers support me, so I feel at ease.

Samundra Subedi
1st-year
Graduated from Kyushu Surveying College
From Nepal

We also have Japanese classes, so even people who aren't good at Japanese or kanji will be fine.

Rajan Nepali
1st-year
Graduated from Toho International Japanese Language School
From Nepal

I want to gain work experience at a company in Japan, and in the future, I want to start my own company in Nepal.

Suzan Gurung
1st-year
Graduated from Kumamoto College of Foreign Languages
From Nepal

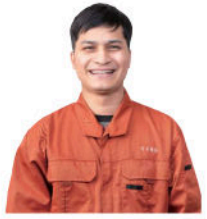

I've made lots of friends, and when there's something we don't understand, we study by teaching each other.

Bahadur Thapa Budha
1st-year
Graduated from Kumamoto YMCA Gakuin
From Nepal

The teachers are kind and explain things carefully, so classes are really enjoyable.

Narayan Thapa
1st-year
Graduated from Aiwa Institute of Foreign Languages
From Nepal

They also support us in finding part-time jobs and apartments, so it's reassuring.

Maikar Sunar
1st-year
Graduated from Kurume International Exchange Academy
From Nepal

With a hands-on, practice-focused curriculum, you can learn Japan's advanced automotive maintenance technology.

Devman Rai
1st-year
Graduated from Enishi Japanese Language School
From Nepal

Automotive Maintenance Department (2-Year Program)

I study together with Japanese students. It's fun because I can learn many different things.

Bikal Pariyar
1st-year
Graduated from Kagoshima College of Computer Business and Public Service
From Nepal

TEACHER

We provide support not only for your studies, but also for daily life.

After working as an automotive mechanic at a Japanese company, I now teach at my alma mater. Let's learn Japan's world-class maintenance technology and become top-level mechanics!

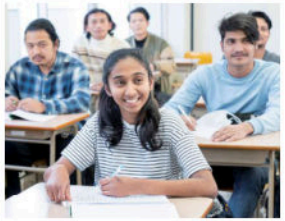

Mr. Suresh (from Sri Lanka)

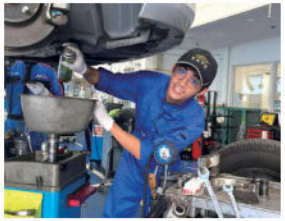

Job Placement Support

We provide strong support to help you find employment in Japan. The employment rate for March 2025 graduates was 100%.

1 **Job placement support from your homeroom teacher and dedicated staff**

2 **Career guidance for getting a job at a Japanese company** (resume writing, interview preparation, etc.)

3 **Company training through our internship program**

※In order for international students to work in Japan, you must obtain permission to change your status of residence from a student visa to a work visa. Our school supports you in obtaining a work visa, so please feel at ease.

vocational school

Miyazaki Welfare Medical College

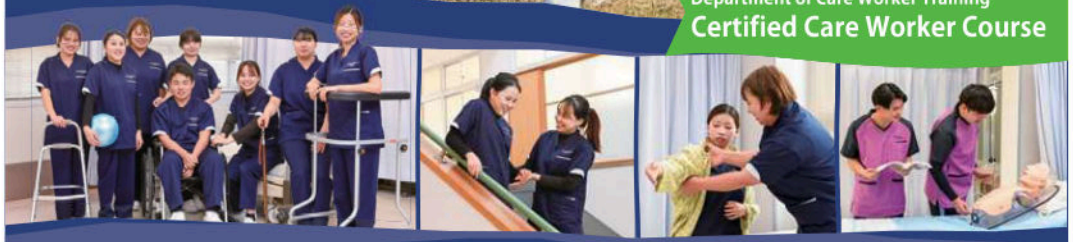

Department of Comprehensive Welfare

Sports Welfare Course

Department of Care Worker Training

Certified Care Worker Course

There are things that can only be done in Nichinan.

GUIDE BOOK 2026

Department of Comprehensive Welfare	Department of Care Worker Training	Department of Social Work
Sports Welfare Course	Certified Care Worker Course	(For University Graduates and Those with Practical Experience Only)

Department of Care Worker Training

Certified Department of Vocational Practical Training by the Ministry of Education, Culture, Sports, Science and Technology

National Qualification by the Ministry of Health, Labour and Welfare

Certified Care Worker Course

2-year program

A caring heart and advanced skills

Experts in nursing care are required to have both a caring heart and advanced skills. In this department, we encourage personal growth through various learning opportunities, along with the acquisition of advanced systematic knowledge and skills. We aim to develop human resources that can be immediately active in society with a diverse and substantial curriculum, including practical training in school facilities, experiential learning in welfare sites, volunteer activities, and even computer practice to develop administrative processing skills.

Available Qualifications

- **Recreation Instructor** (Certified by the Japan Recreation Association)
- **Sign Language**
- **Housing Environment Coordinator for Elderly and Disabled People**

Career Paths After Graduation

- Special Elderly Care Home (Designated Nursing Care Elderly Welfare Facility)
- Long-term Care Health Facility
- Social Welfare Council
- Group Home
- Service-Attached Housing for the Elderly
- Support Facility for Persons with Disabilities
- Nursing Care Staff at Medical Institutions,
- Fee-based Elderly Care Home etc.

Baseball & National Qualifications

You can also register as a player **while enrolled in the Care and Welfare Department.**

Scholarship Exam

Selection Method

Written Exam

Japanese / Math ··· 50 minutes

English / General Knowledge ··· 50 minutes

● What is the "Scholarship" Certification Exam?

It is a system that partially waives the first-year tuition.

Scholarship Rank Categories and Waived Amounts

Rank	Waived Amount
Special A	350,000 yen
A	250,000 yen
B	150,000 yen
C	100,000 yen

Teacher's Voice

Ms. Mihoko Hirosawa

A lifelong career with many job openings to choose from

I cover topics such as how the body works, illnesses, and medical-related subjects. Caregiving is a challenging job, but through person-to-person connections, you can bring joy to those you care for while also gaining your own learning experiences and sense of fulfillment. Let's enjoy learning together.

Seniors Who Achieved Their Dreams

Because I spent two years studying at the college, I was able to secure my current job and become who I am today.

Currently, I provide training and support in productive activities and work skills for day-service users. I can see their growth and increasing motivation to work up close, which makes the job very rewarding. It also reminds me that every day matters. At the college, I learned many things and enjoyed fun events, too. It was a fulfilling two years. Who I am today is thanks to those two years at the college.

NPO ONCE IN A LIFE TIME | Kurumi Kai

Work in welfare and caregiving is a field where you can most strongly feel the richness that comes from connecting with people.

My main duties are providing daily living care, such as assistance with meals, toileting, and dressing. I have realized that welfare work is built on connections with many different people, and that communication skills are essential in carrying out my duties. When I was a student, I served as the head of the school festival committee and had opportunities to interact with students from other departments. I feel that the skills I gained through those experiences are helping me in my work today.

Morito Inoue

When my coworkers and senior colleagues help each other, it motivates me to do an even better job.

My work involves providing physical and emotional support to people who need assistance with daily activities. I accompany them when needed and monitor their health condition. I feel most fulfilled when I see that my support brings value to others. I am passionate about the company's mission and values, and I believe they will play an important role in my long-term growth and success.

Hakuai Co., Ltd. | MORRIS ANTONIO SAYSON

What I find rewarding is seeing the users' smiles and hearing them say "thank you."

At school, I learned not only textbook knowledge but also a variety of practical caregiving skills, which are helping me in my current job. Working in caregiving as a foreigner can be challenging at times. However, when a user smiles and says, "Thank you," it makes me want to work even harder.My goal for the future is to obtain a qualification related to dementia care.

Care Welfare Department

Student-only apartment

Student-only apartments for our college

1K From 30,000 yen | Fully furnished with appliances. ※Limited availability. | A 3-minute walk from the college.

The apartment is fully equipped with appliances, so I was able to start my daily life right away. I was nervous because it was my first time living alone. However, the neighborhood environment is good, and there are many people who support me. Thanks to that, I can live here with peace of mind.

Yuki Nakazuru
(graduated from Miyakonojo Nishi High School)
